About

Senior Product Designer with over five years of experience spanning brand identity, design systems, and end-to-end product design. I take a systems-first approach — building the foundations that make teams faster, products more consistent, and design decisions easier to defend. I've built and governed a production design system from scratch, redesigned a payment product used by millions, and delivered complex multi-platform products from brief to handoff. I work best when I can go deep on a problem and then pressure-test it with the people around me.

Skills

Design Design systems and tokens, Interaction design, Rapid prototyping, Accessibility (WCAG), Design ops, Visual design

Leadership Cross-functional collaboration, Design leadership, Mentoring, Product thinking

Tools Figma, Framer, Webflow, Illustrator, Photoshop, HTML, CSS, React (prototyping), AI-assisted workflow automation and prototyping (Claude)

Work Experience

Senior Product Designer and Design Lead

Jan 2023-Present

Barion Payment Inc, Budapest, Hungary

- Built and governed the Barion Design System from scratch — a three-tier token architecture covering **98 primitives** and **104 tokens** across mobile, web, and marketing surfaces, reducing **design-to-development effort by 80%** and enabling a seamless dark mode rollout across all products.
- Led end-to-end redesign of the Barion Smart Gateway, a payment product used by millions of merchants across Hungary, achieving **94%+ CSAT** and a **60% reduction in average session duration**.
- Designed the new Barion mobile app and web app end-to-end, including a recipient management system that eliminated a key friction point in repeat payment flows — both currently in active development.
- Introduced coded prototyping into the design process, building working low-fidelity prototypes before high-fidelity handoff to surface edge cases, error states, and interaction problems early.
- Championed accessibility across the product, elevating the accessibility score from **A to AAA**.
- Ran developer workshops and weekly design-dev-management alignments, saving at least 2 hours per week in handoff and clarification time.
- Mentored junior designers and contributed to team-wide process improvements.

Freelance Designer

Aug ‘22-Present

GEN6 – Brand identity and Product Design

June - Oct ‘25

- Developed a complete brand identity and scalable design system for a blockchain-based platform from scratch.
- Designed user flows, wireframes, and high-fidelity UI across a multi-module web application covering event organisation, document signing, storage, and identity verification — delivered across mobile and web.

The Scent Shop – Brand Strategy and Design

Nov ‘23 - Feb ‘24

- Led stakeholder workshops to define brand strategy and positioning.
- Delivered a full brand package including logo, typography, packaging, and social media templates, with a brand guide that reduced production time by 90% across five categories of marketing material.

Education

Masters in Graphic Design Sep 2020-Jul 2022

Budapest Metropolitan University, Budapest, Hungary

- Graduated with excellence, completing a thesis centered on brand strategy, visual identity, and UI/UX design.
- Conducted user research, feedback analysis, competitor benchmarking, and market studies to guide strategic and design decisions.

Bachelors in Interior Design Sep 2017-Jul 2020

Budapest Metropolitan University, Budapest, Hungary

- Graduated with distinction, completed a thesis project focussed on the interior design of a multi-story museum space.
