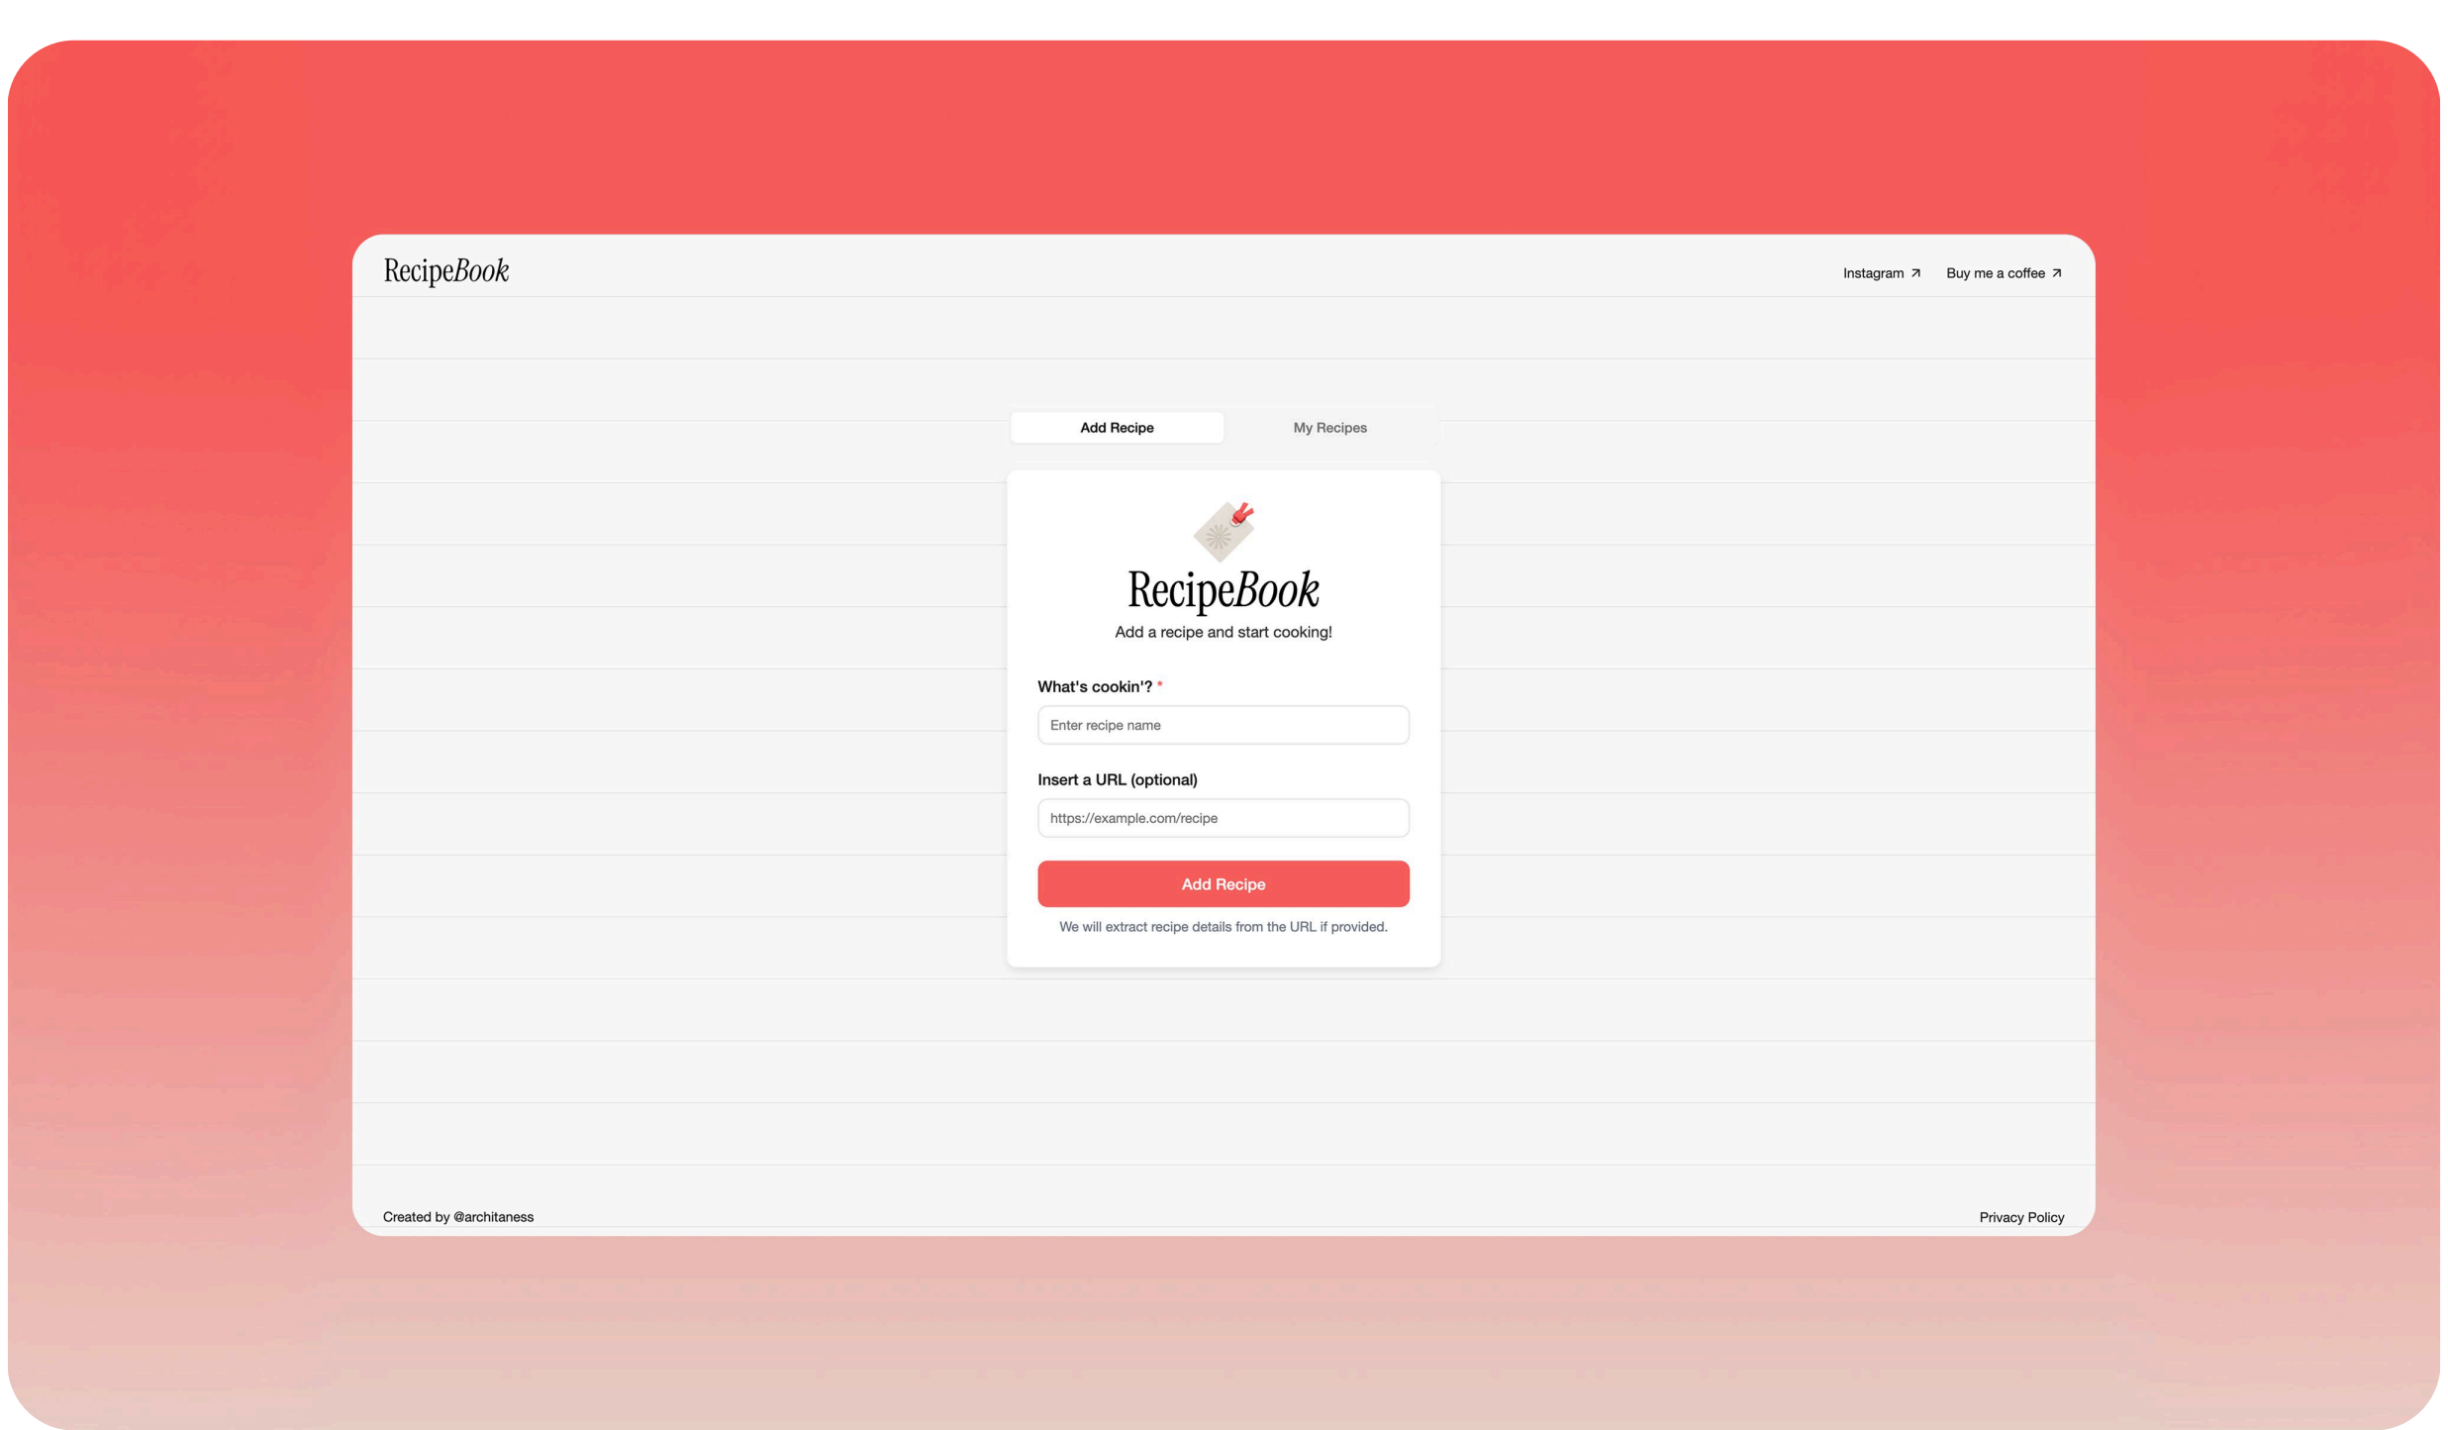
RecipeBook

A personal web app for saving recipe links from the web and creating custom recipes — all in one organised collection.

● Live | Designer & Builder | ~1 week (2025) | Personal Project | Web App | recipe-book.site



Summary

RecipeBook is a personal web app that helps people save, organise, and revisit recipes in one clean, dedicated space. It supports both URL-based recipe imports and fully custom recipe creation, bringing scattered bookmarks, screenshots, and notes into a single personal cookbook.

I was responsible for:

- The product concept and feature scope, focused on two core actions: importing recipes from URLs and creating recipes manually.
- The home page design, with clear entry points for URL import and custom recipe creation.
- The saved recipe library, with list view, favouriting, date added, and source links.
- The custom recipe editor, including structured sections for ingredients, step-by-step instructions, and notes.
- A live web app launched at recipe-book.site, with the core recipe-saving experience operational.

Saved recipes	Designed & launched in	Called for back-end support	At recipe-book.site

Problem

Recipe lovers tend to bookmark links across browsers, screenshot cards, and write steps in notes apps — none of which are organised or shareable. There was no lightweight tool that handled both saved web recipes and custom user-created ones in a single, clean interface.

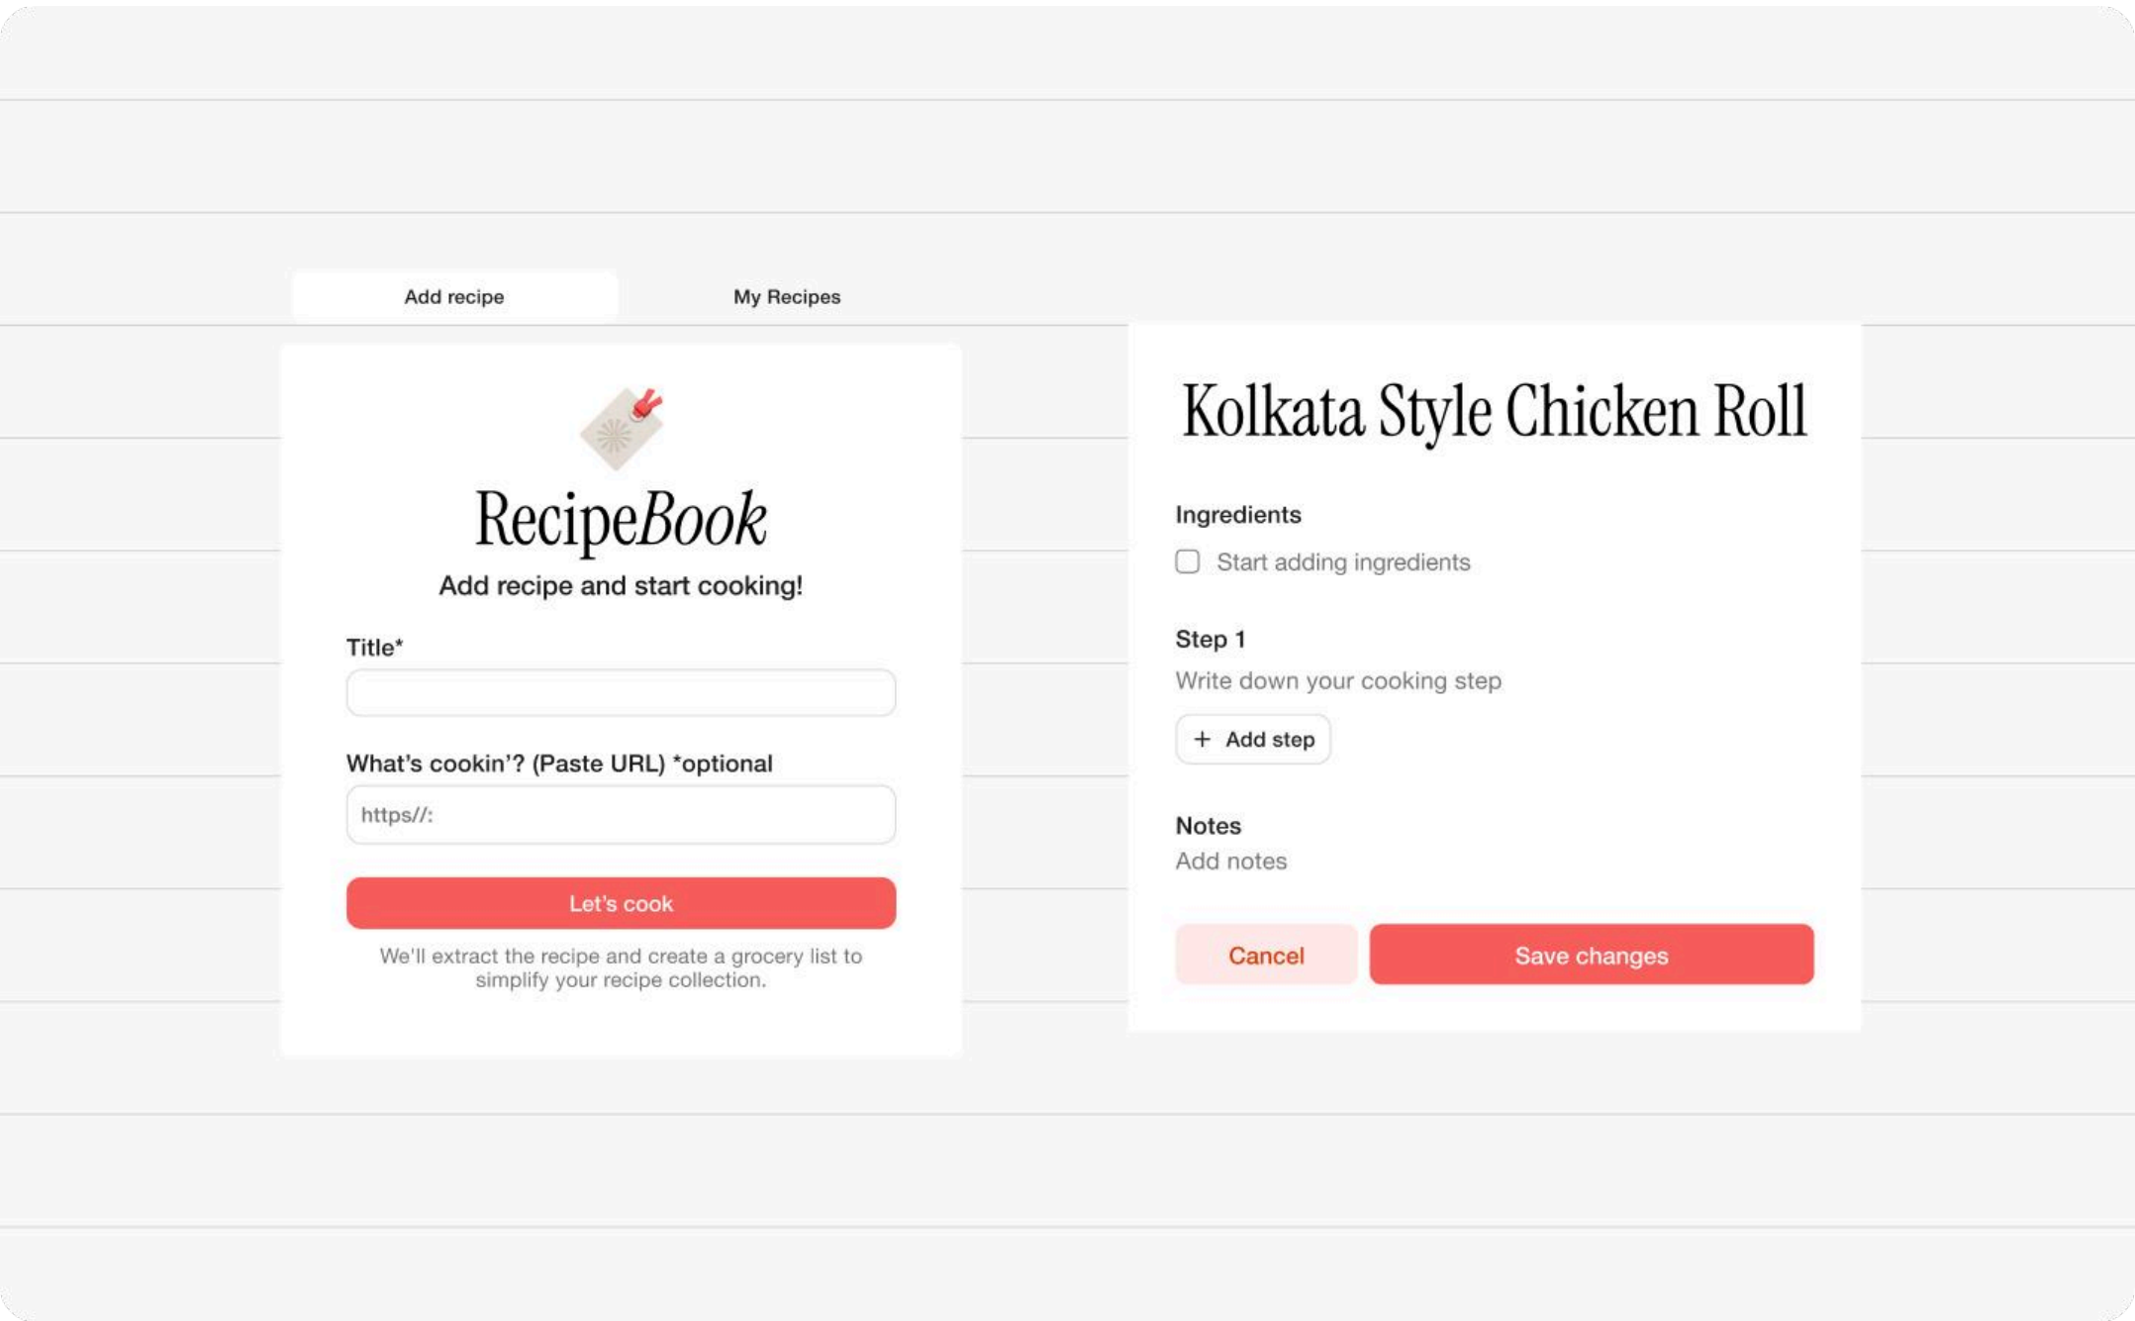
Process

Youtube embed

Solution

Home page with URL paste field users can import any recipe from the web.

Any URL from a recipe site, can be pasted here, and is parsed and saved into the library.



We'll extract the recipe and create a grocery list to simplify your recipe collection.

Custom recipe editor

Title, ingredients (checkbox list), step-by-step instructions, and free-form notes.

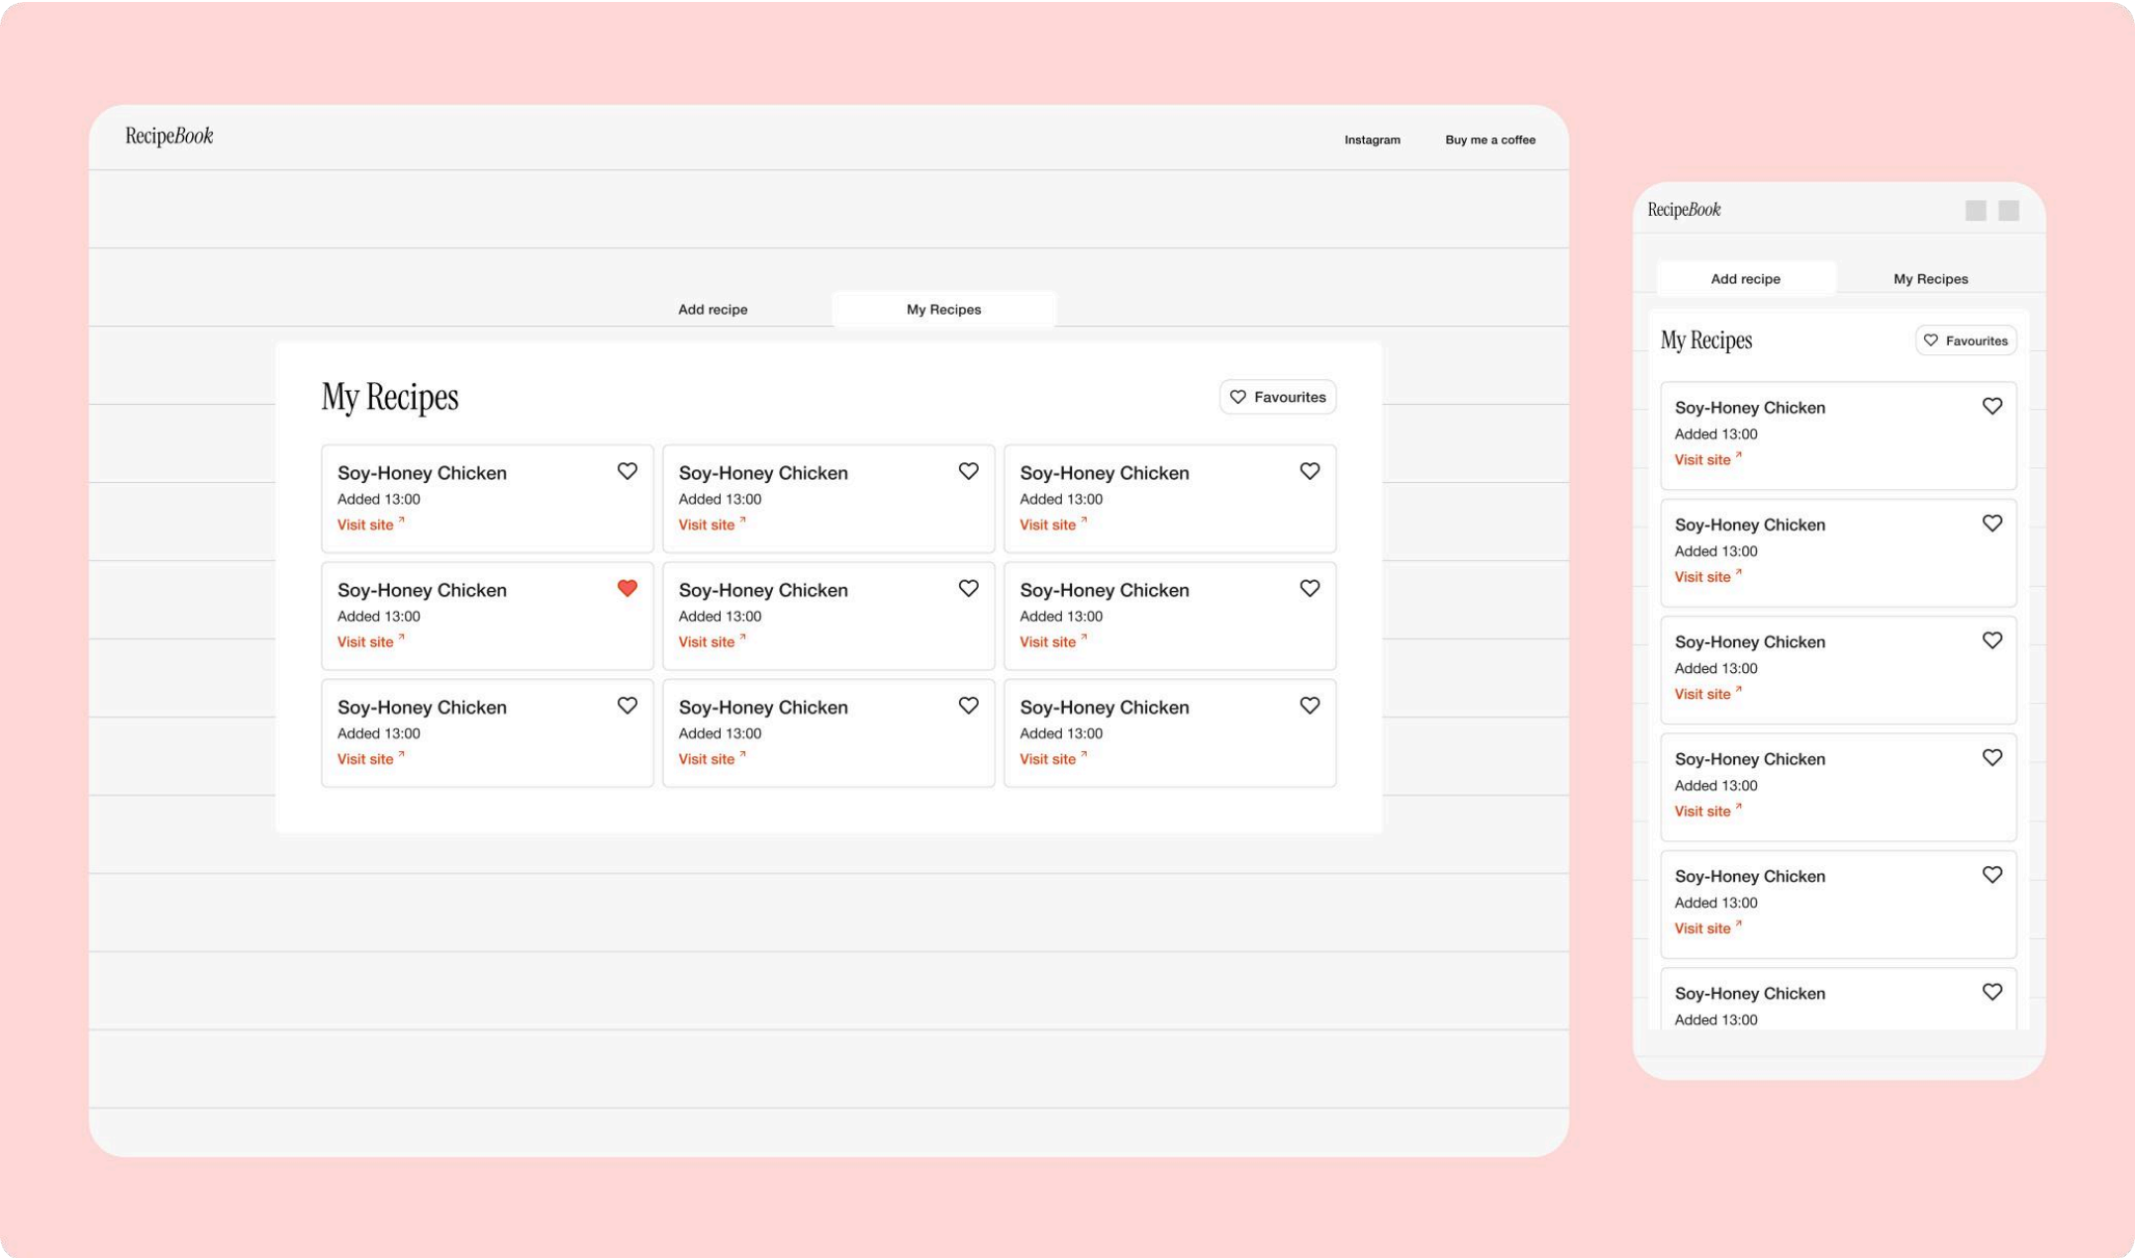
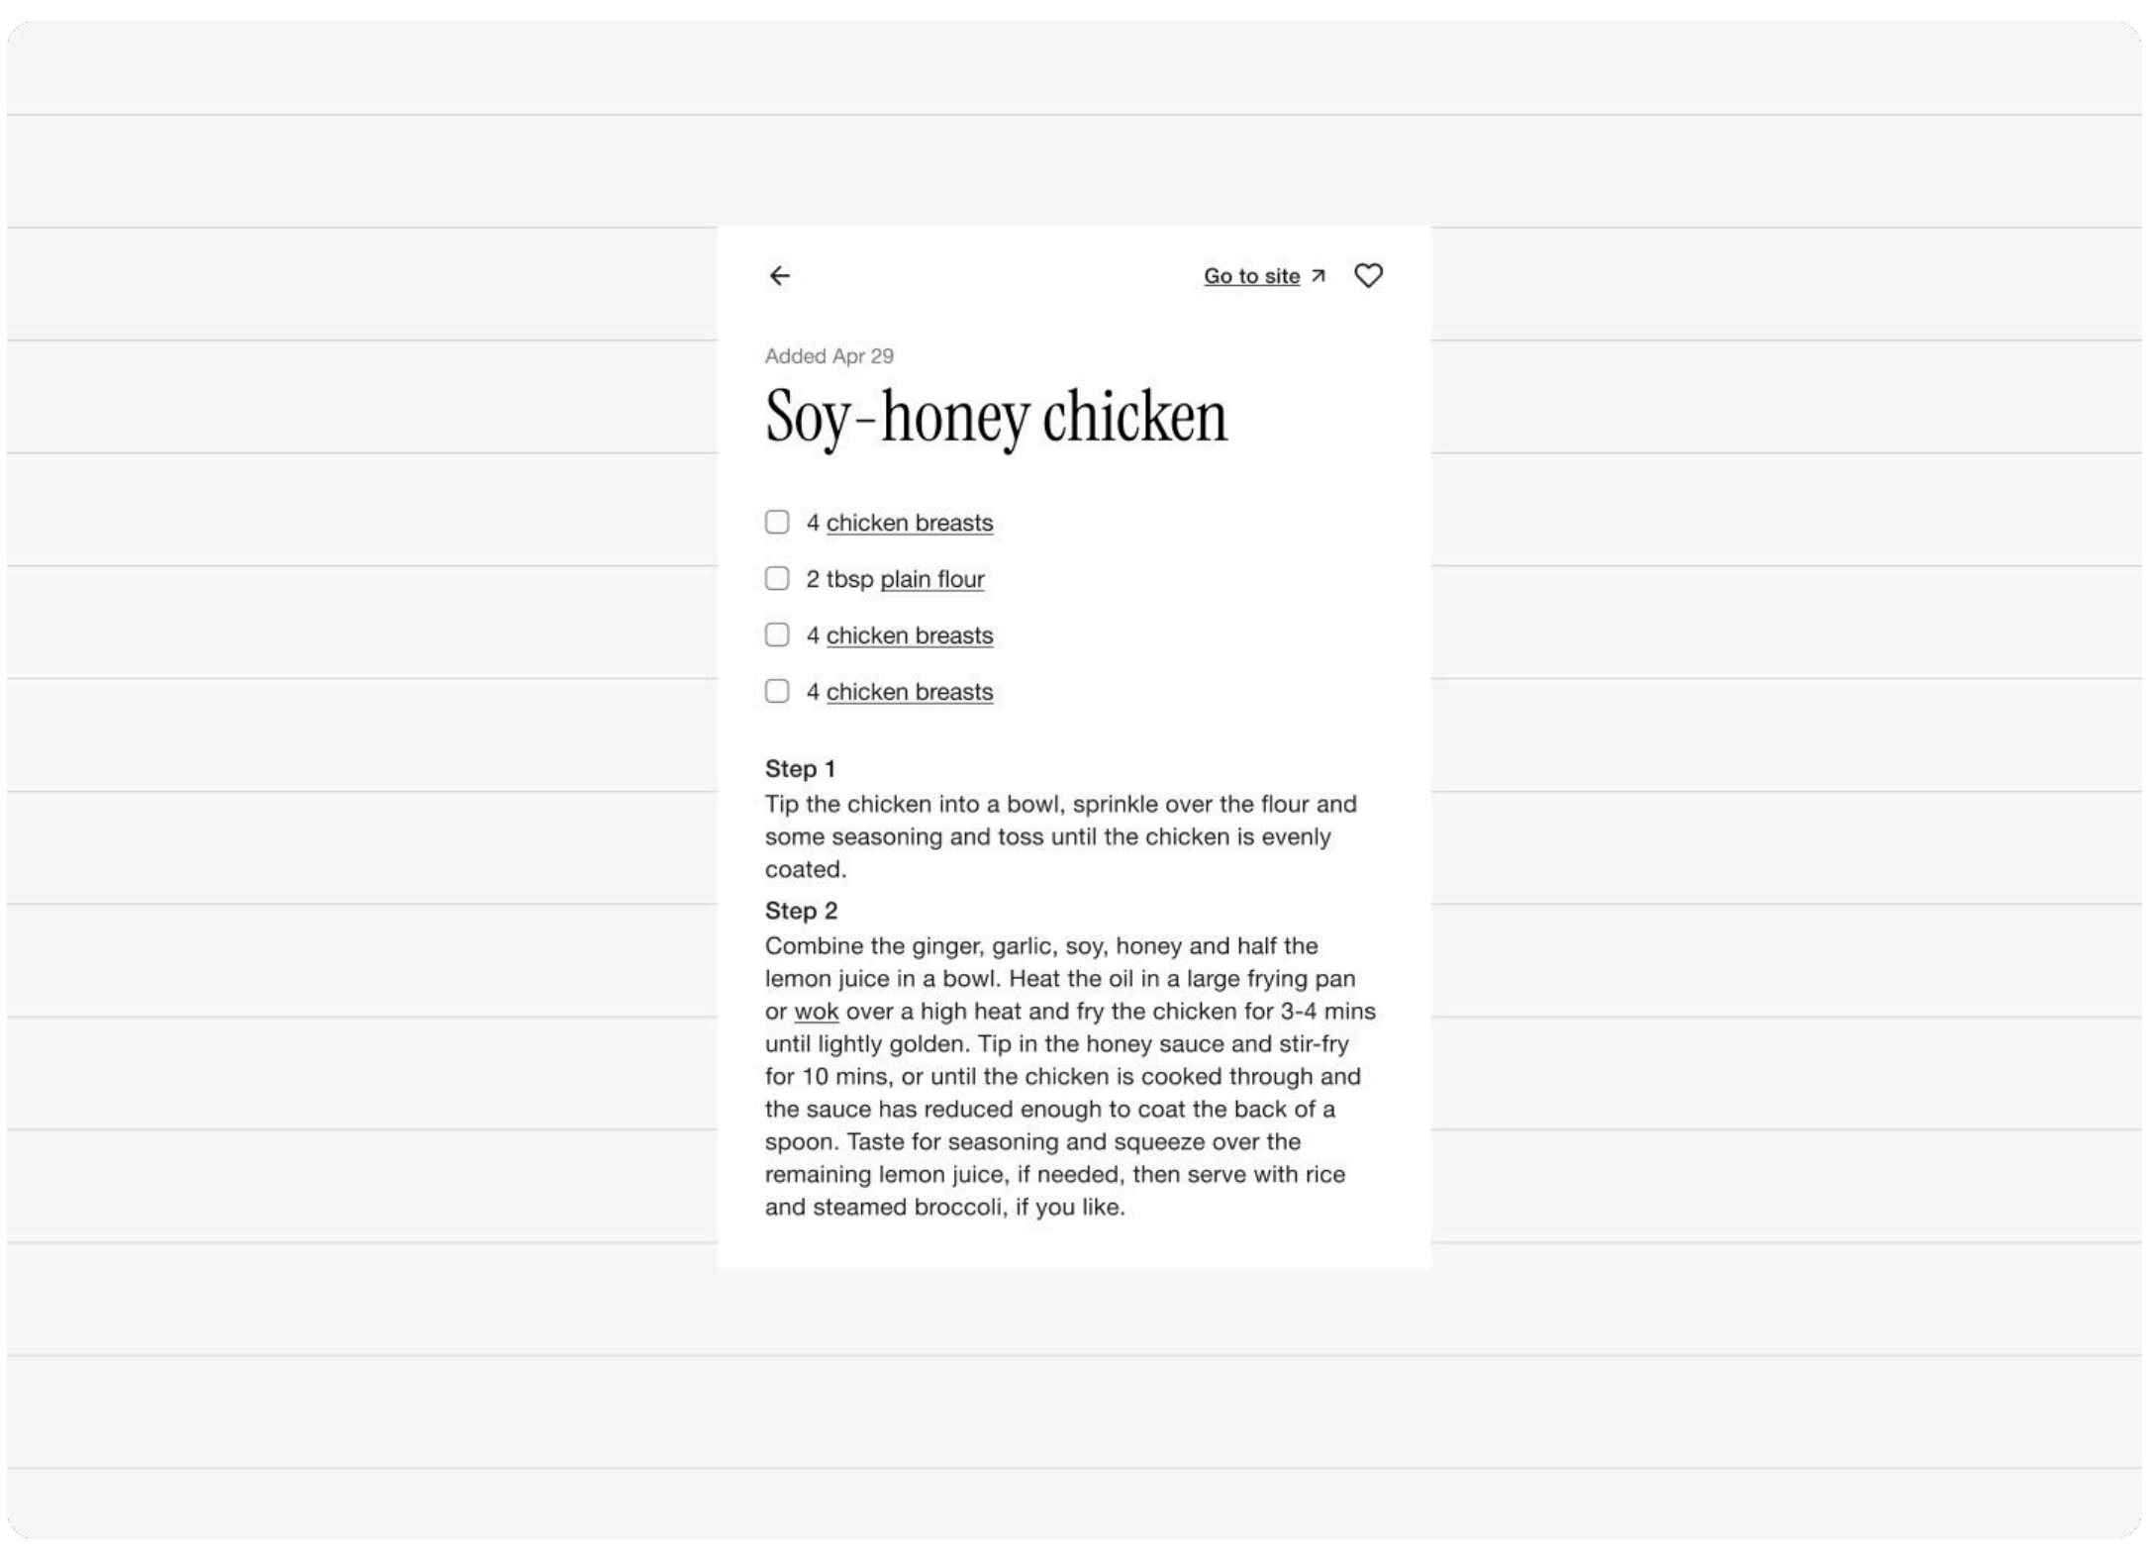
My Recipes library

All saved recipes in a clean list with date added, source link, and favouriting.



Full recipe detail view in both short and long formats.



☐ 4 chicken breasts
☐ 2 tbsp plain flour
☐ 4 chicken breasts
☐ 4 chicken breasts

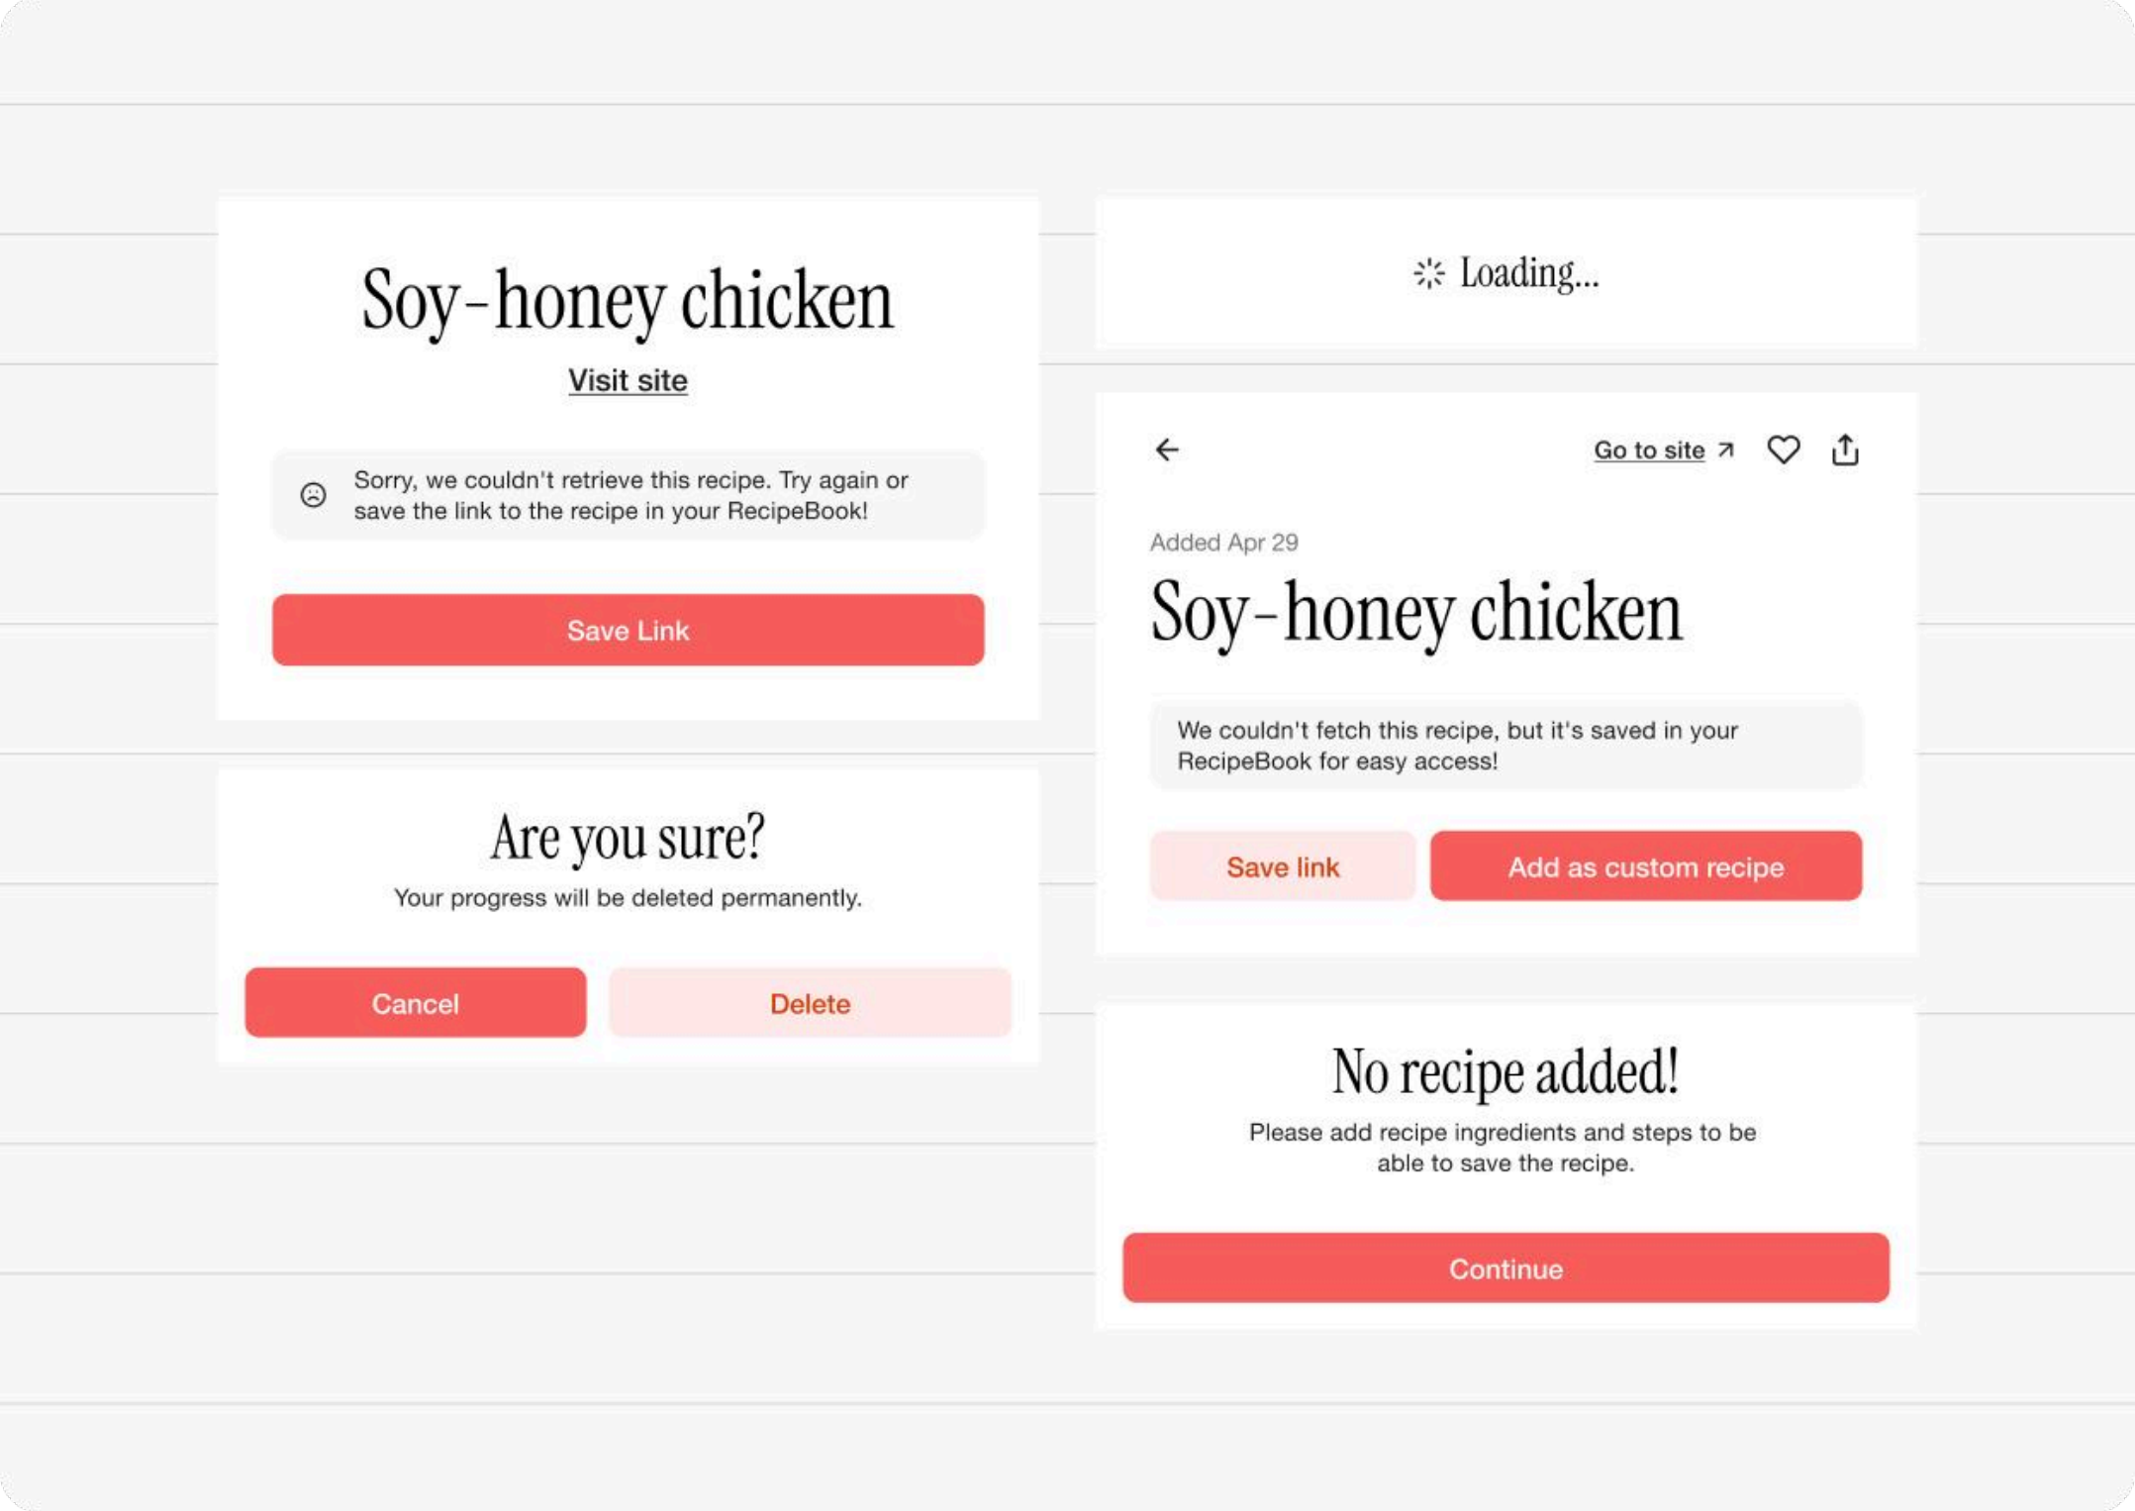
Step 1
Tip the chicken into a bowl, sprinkle over the flour and some seasoning and toss until the chicken is evenly coated.

Step 2
Combine the ginger, garlic, soy, honey and half the lemon juice in a bowl. Heat the oil in a large frying pan or wok over a high heat and fry the chicken for 3-4 mins until lightly golden. Tip in the honey sauce and stir-fry for 10 mins, or until the chicken is cooked through and the sauce has reduced enough to coat the back of a spoon. Taste for seasoning and squeeze over the remaining lemon juice, if needed, then serve with rice and steamed broccoli, if you like.

I also, didn't want any extensive backend for this project, so at the moment, this app stores recipes locally but can be shared across devices using a share link.

Designed all secondary states

Loading, error (not logged in), delete confirmation modal, and empty state.



Sorry, we couldn't retrieve this recipe. Try again or save the link to the recipe in your RecipeBook!

Your progress will be deleted permanently.

We couldn't fetch this recipe, but it's saved in your RecipeBook for easy access!

Please add recipe ingredients and steps to be able to save the recipe.

Outcome

Designed and shipped within one week — live at recipe-book.site

- The app has seen 417 recipes so far and good reviews. However, hasn't seen much traffic since 2025 as many more apps have come up for both mobile and web use that perform this exact function.
