T'Time

A conceptual wellness brand built around tea - selling organic teas and providing a mindful tea drinking experience through a companion mobile app.

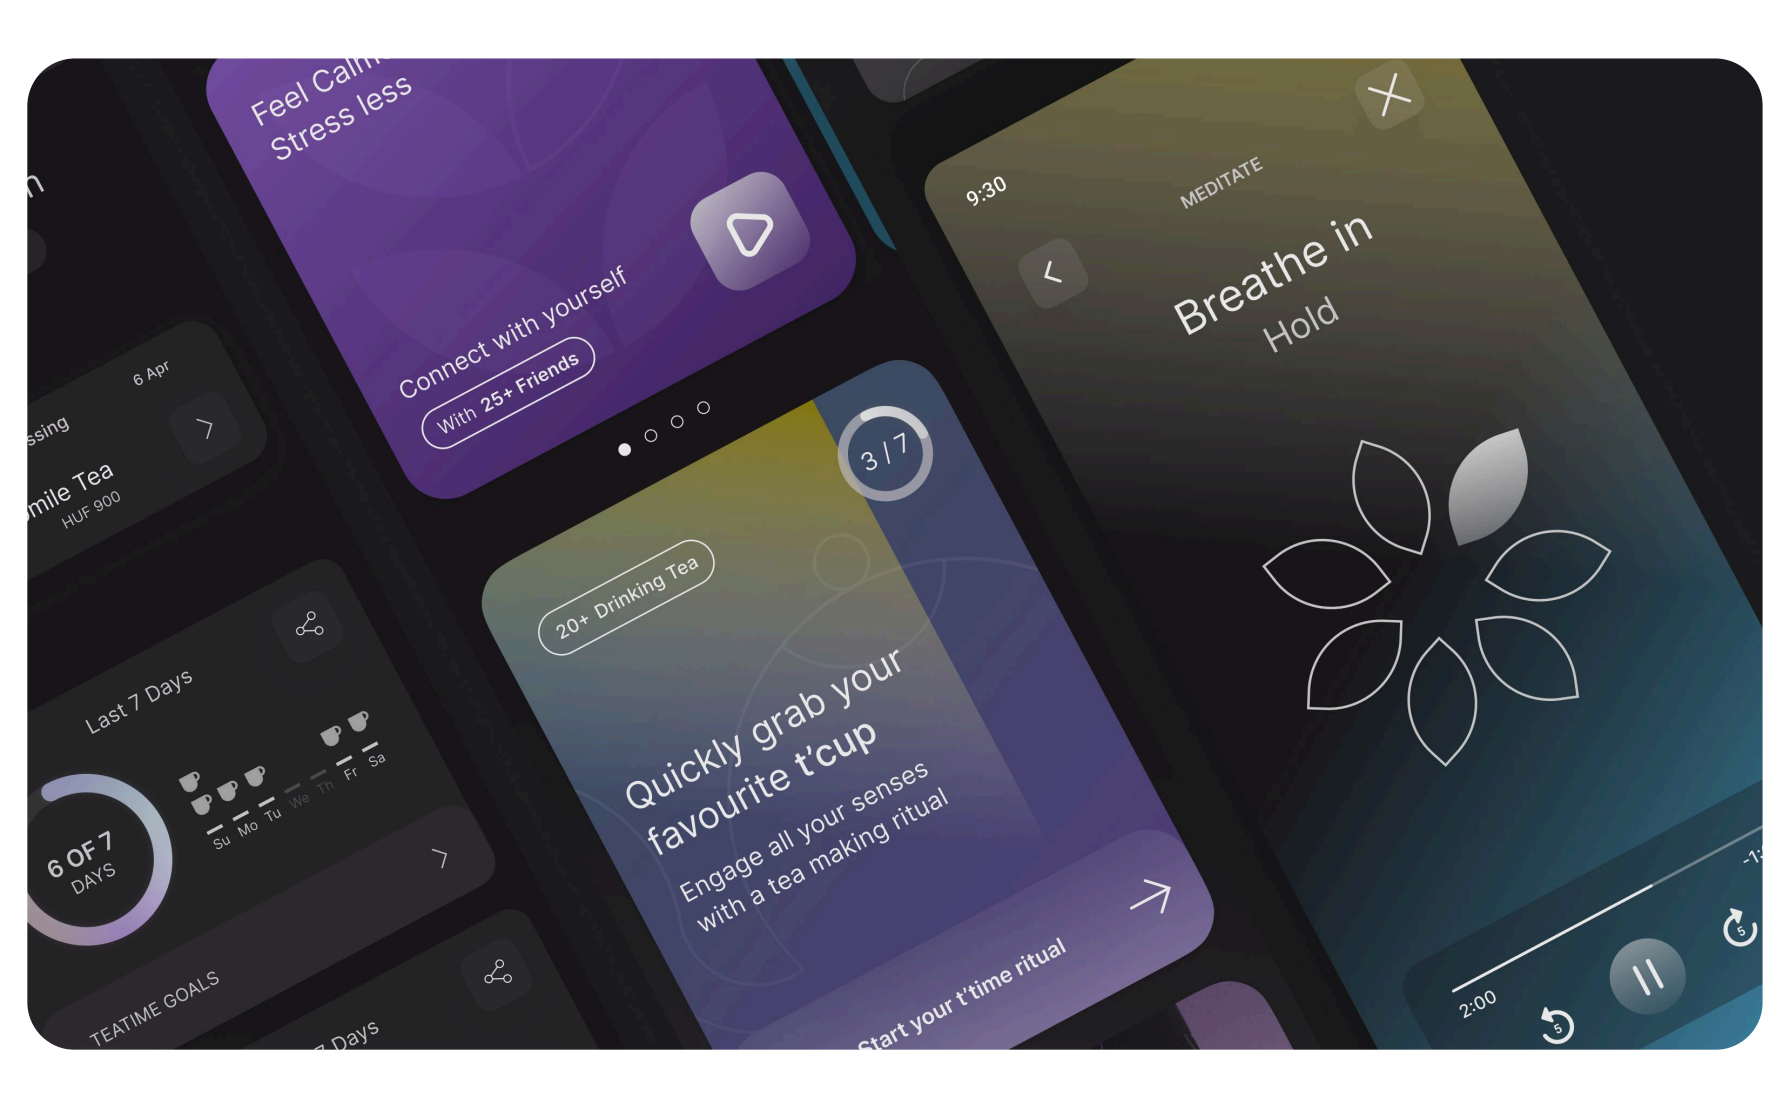
Brand + Mobile App



Summary

T'time is a conceptual wellness brand and mobile app designed around mindful tea drinking. Created as my Master's thesis project, it brings together brand identity, packaging, and app design into one calm, cohesive experience.

Master's thesis project

Multi-disciplinary
Brand + app delivered

74.4%
Of surveyed users aligned with product concept

Problem

Unmet audience need

The target audience - Millennials and Gen-Z - are the largest demographic of tea drinkers, but no brand was effectively merging the ritual of tea with modern wellness and mindfulness.

Cross-medium coherence

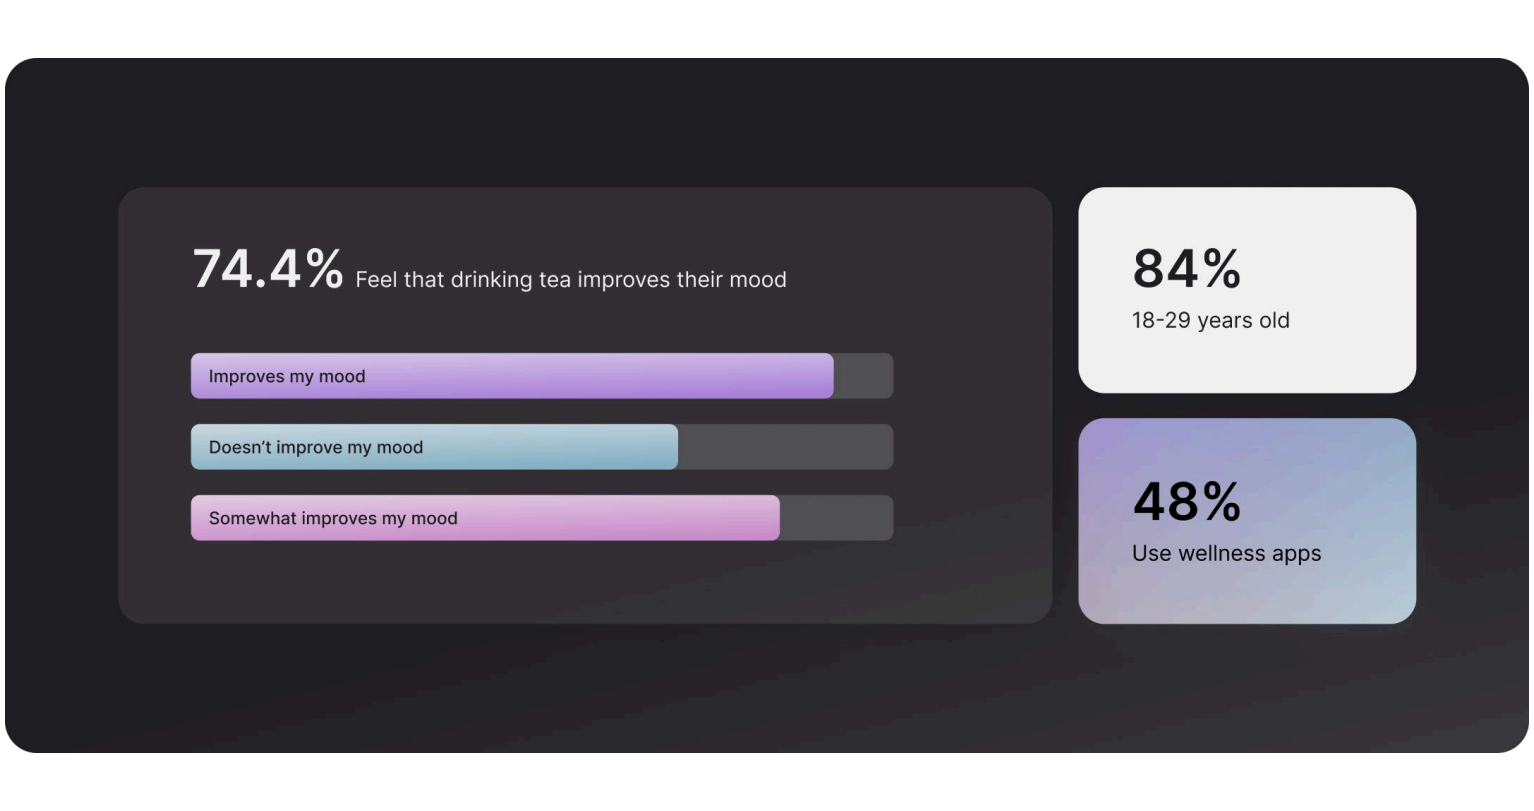
The brand identity needed to live coherently across logo, physical tin packaging, advertising collateral, and a mobile app UI.

Zero-friction UX

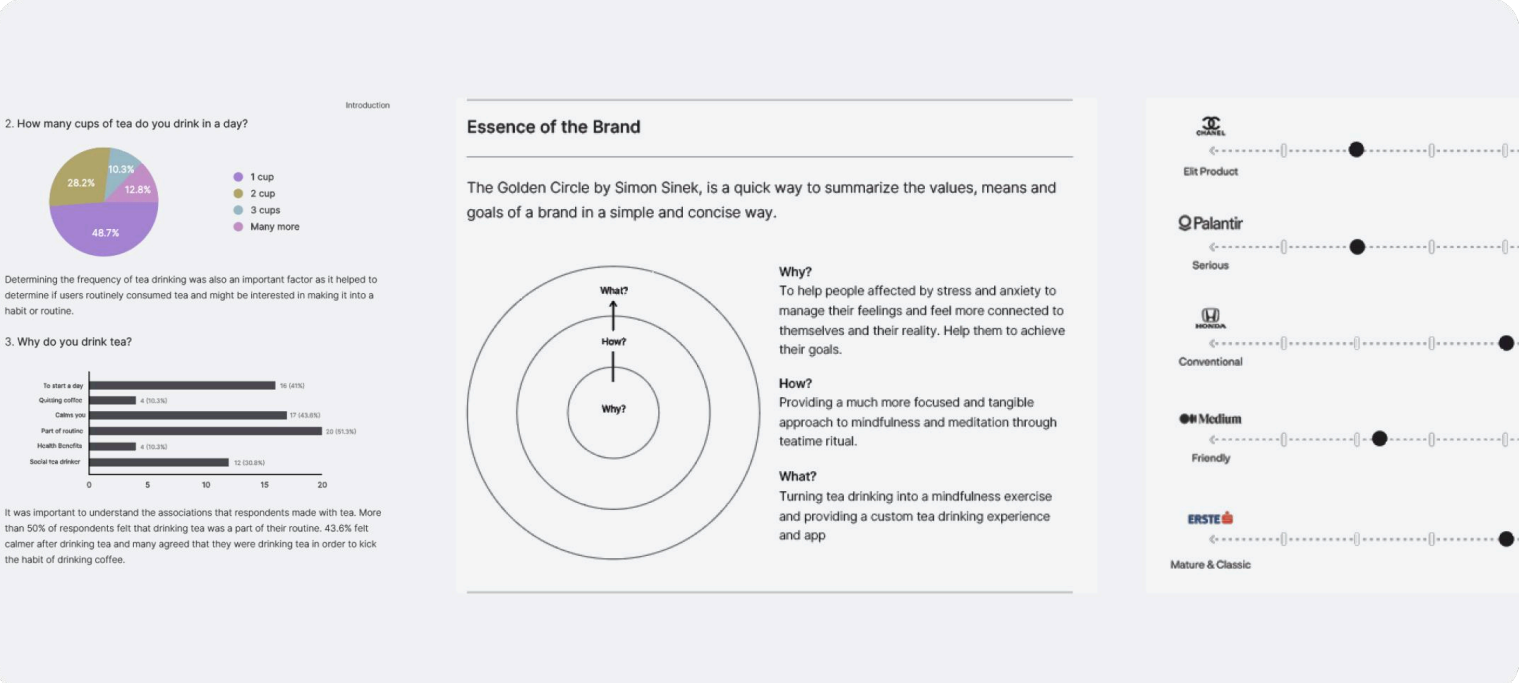
The app needed to reduce friction to near zero: users dealing with stress or anxiety don't have patience for complicated onboarding or navigation.

Process

1. Conducted a survey targeting 18-29 year old tea drinkers. 74.4% reported that drinking tea improves their mood; 43.6% said tea was part of their daily routine.

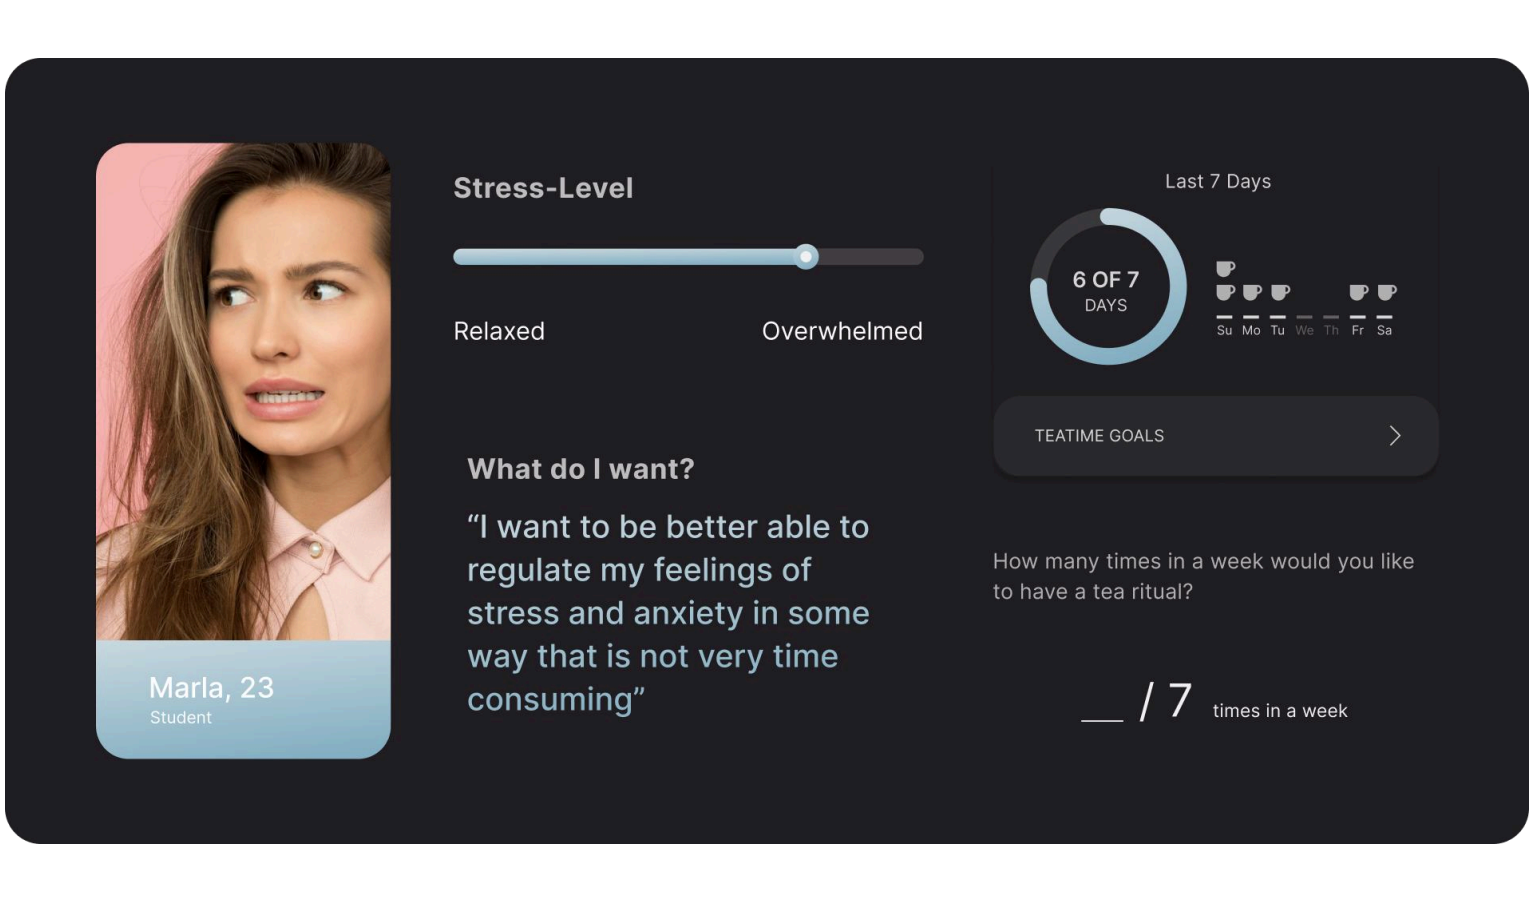


2. Applied the Golden Circle framework to define the brand's Why, How, and What.



3. Mapped the brand's competitive position against wellness, meditation, and lifestyle apps.

4. Created user personas (Marla, 23 - stressed student; John, 26 - distracted marketing manager) revealing a consistent need: fast, non-intrusive stress relief.

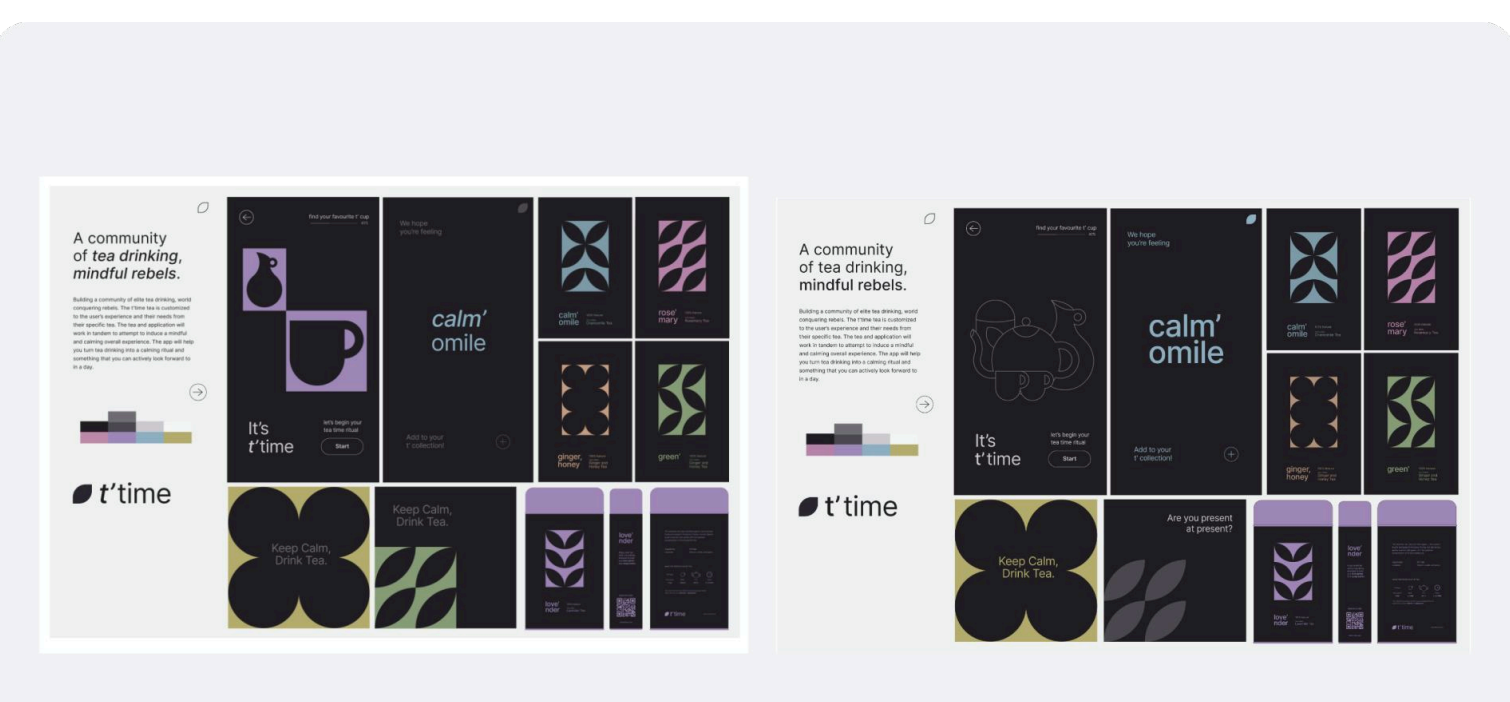


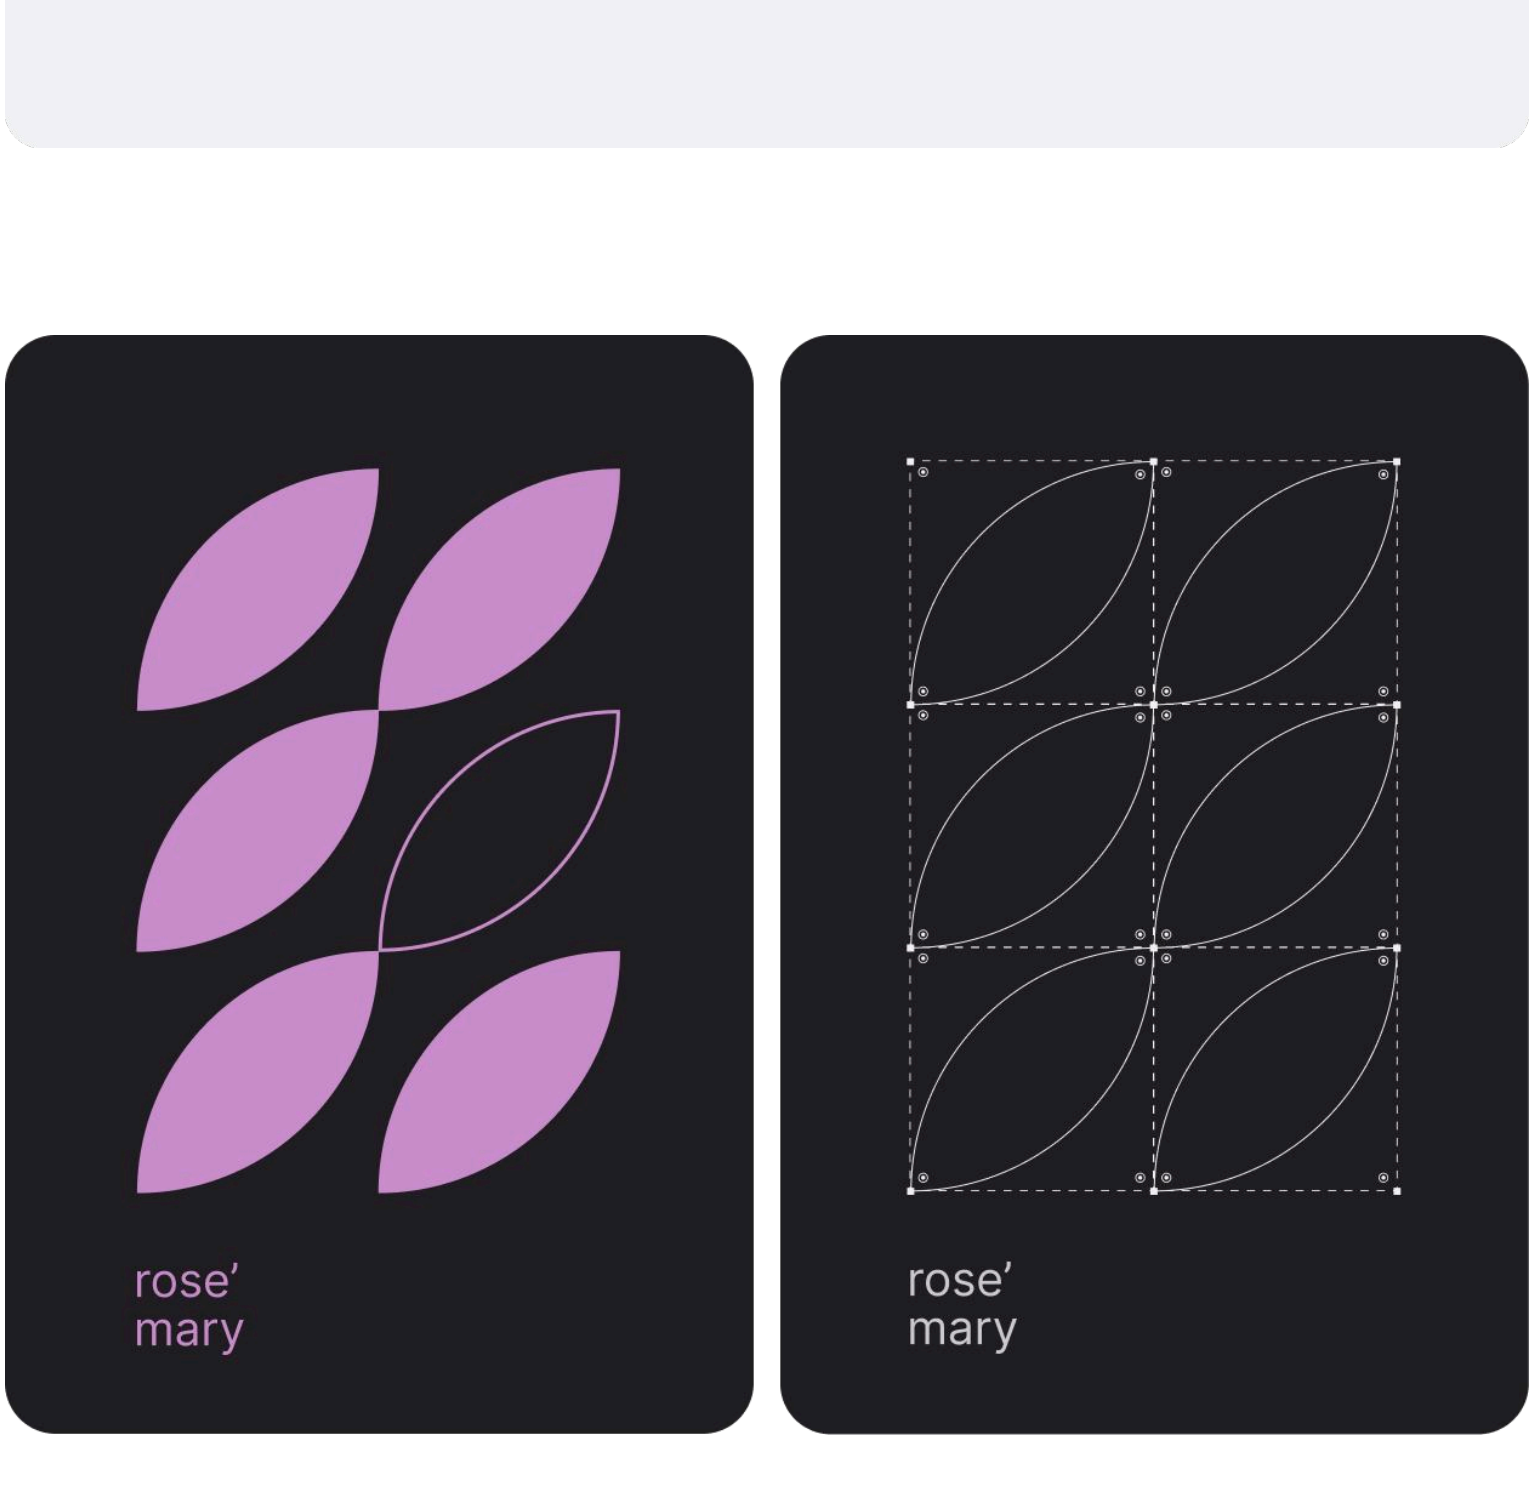
What do I want?

"I want to be better able to regulate my feelings of stress and anxiety in some way that is not very time consuming"

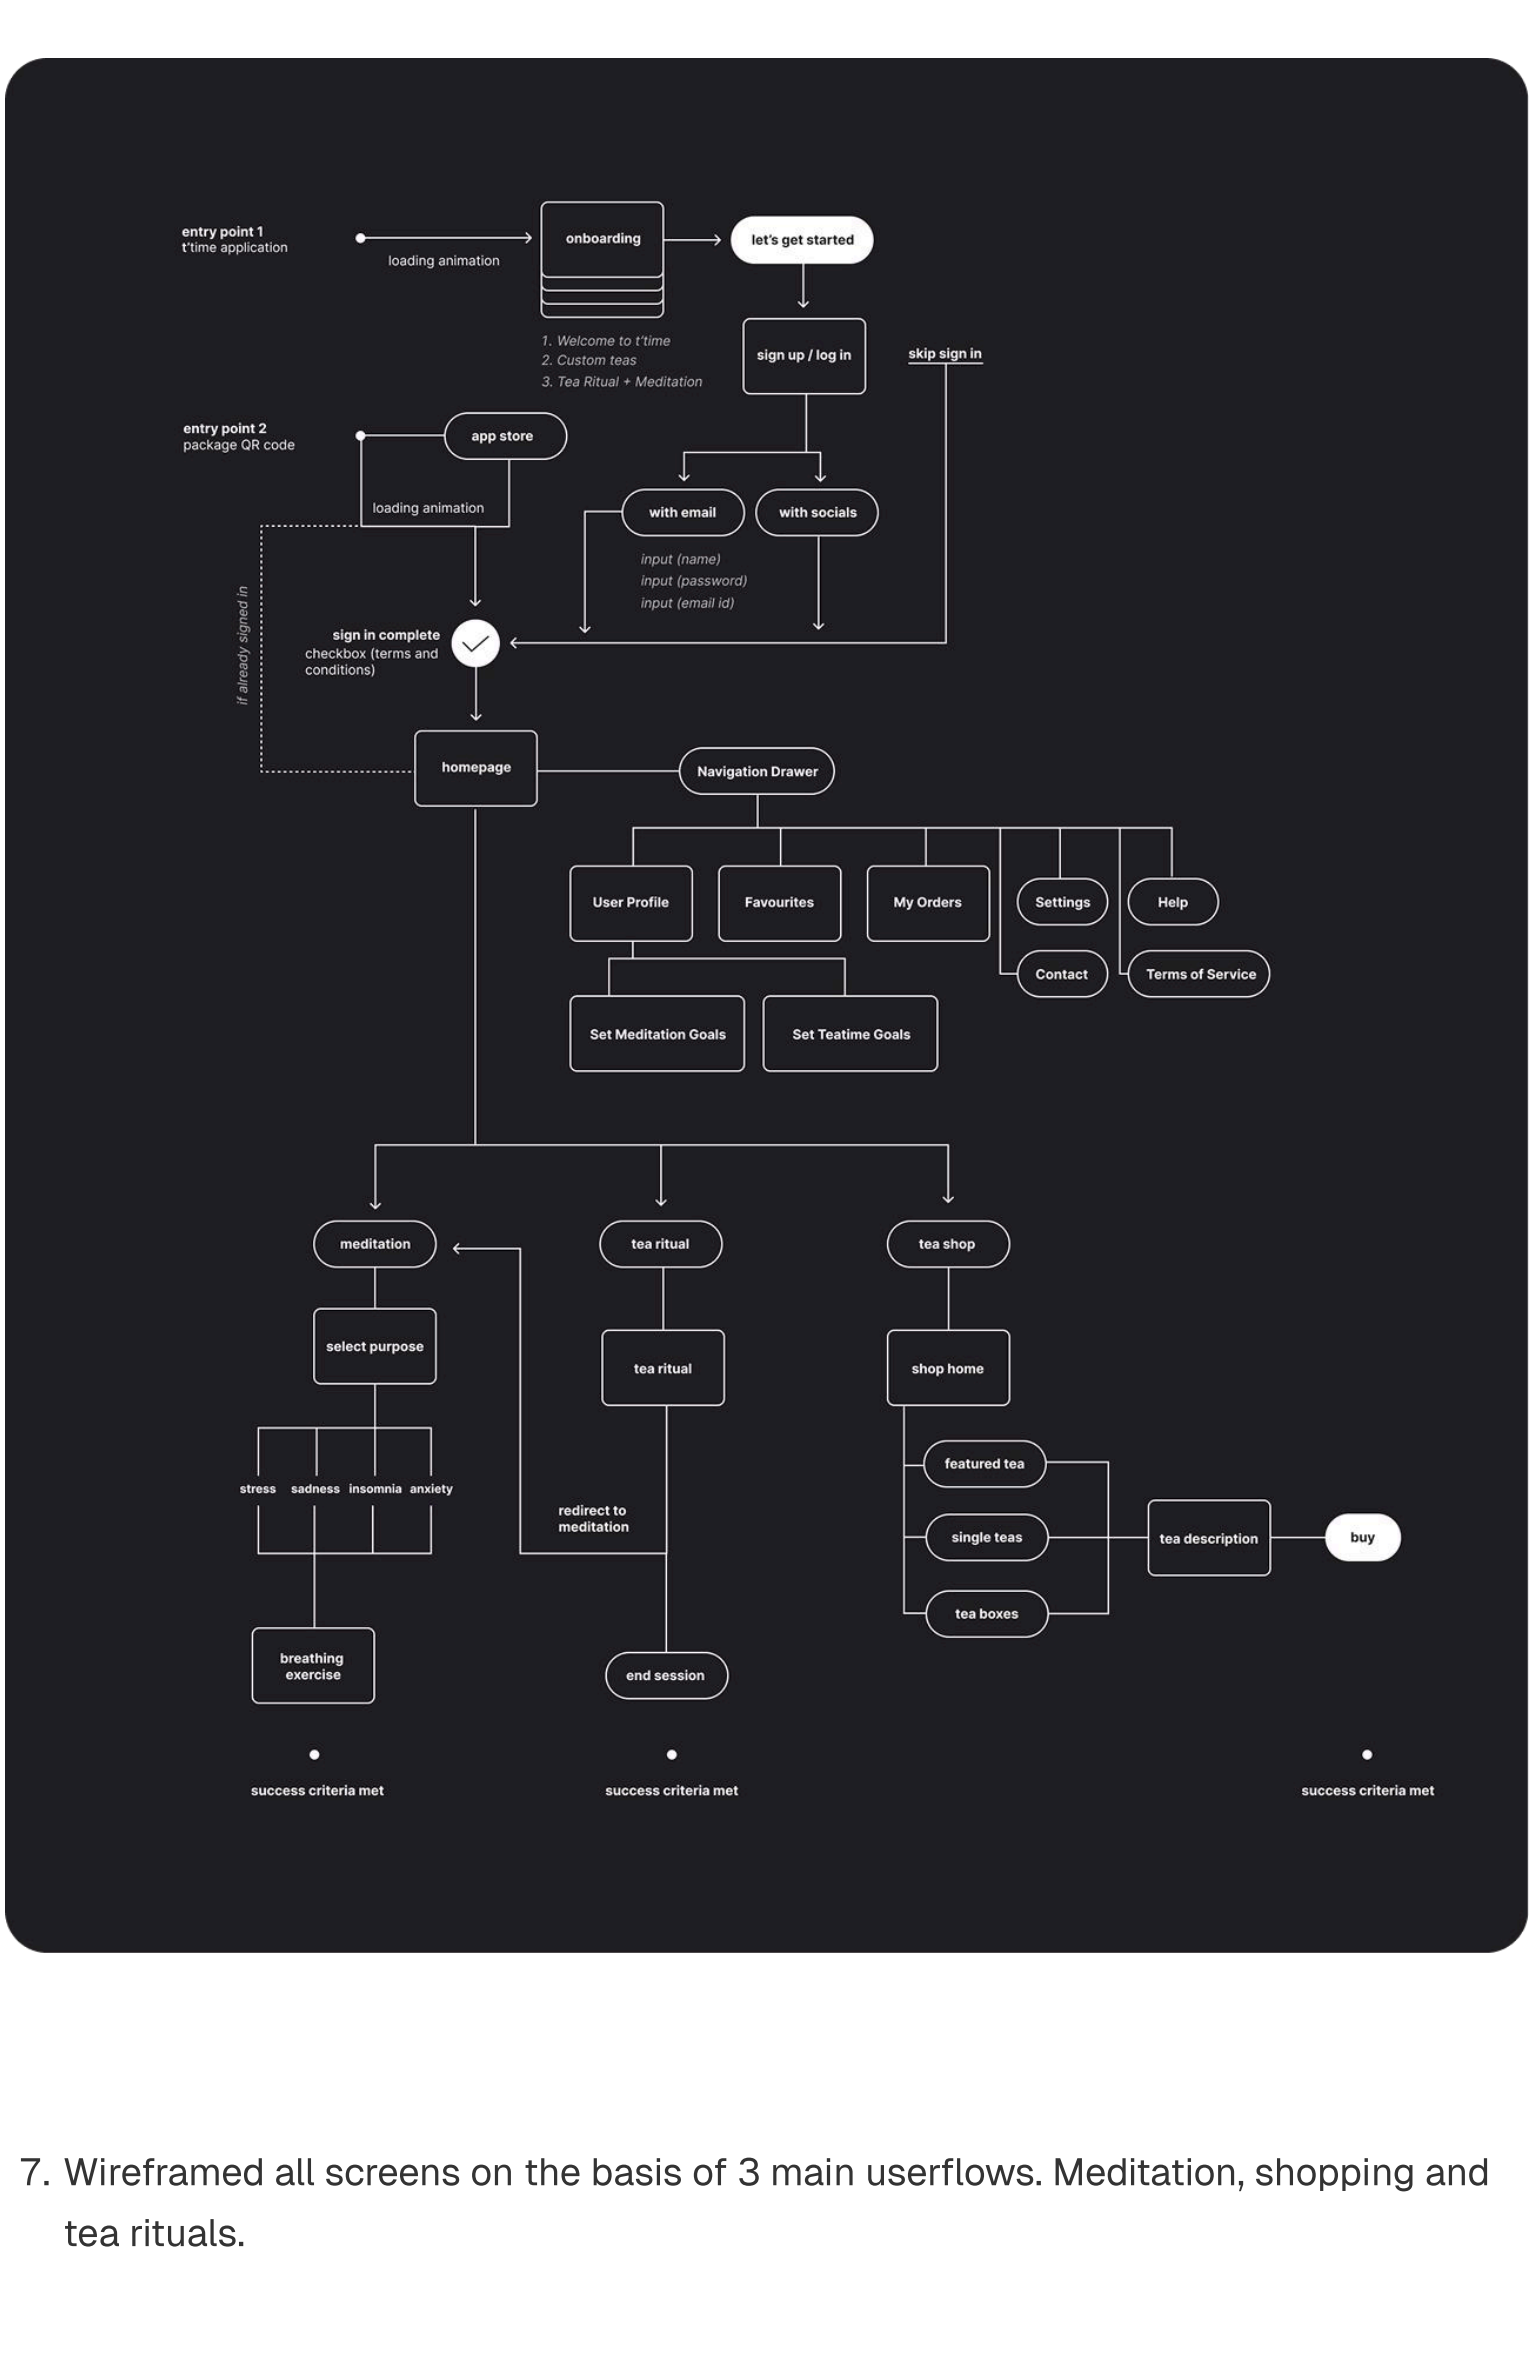
How many times in a week would you like to have a tea ritual?

5. Built multiple stylescapes and iterated until a dark, cool-calm aesthetic with botanical iconography was chosen.

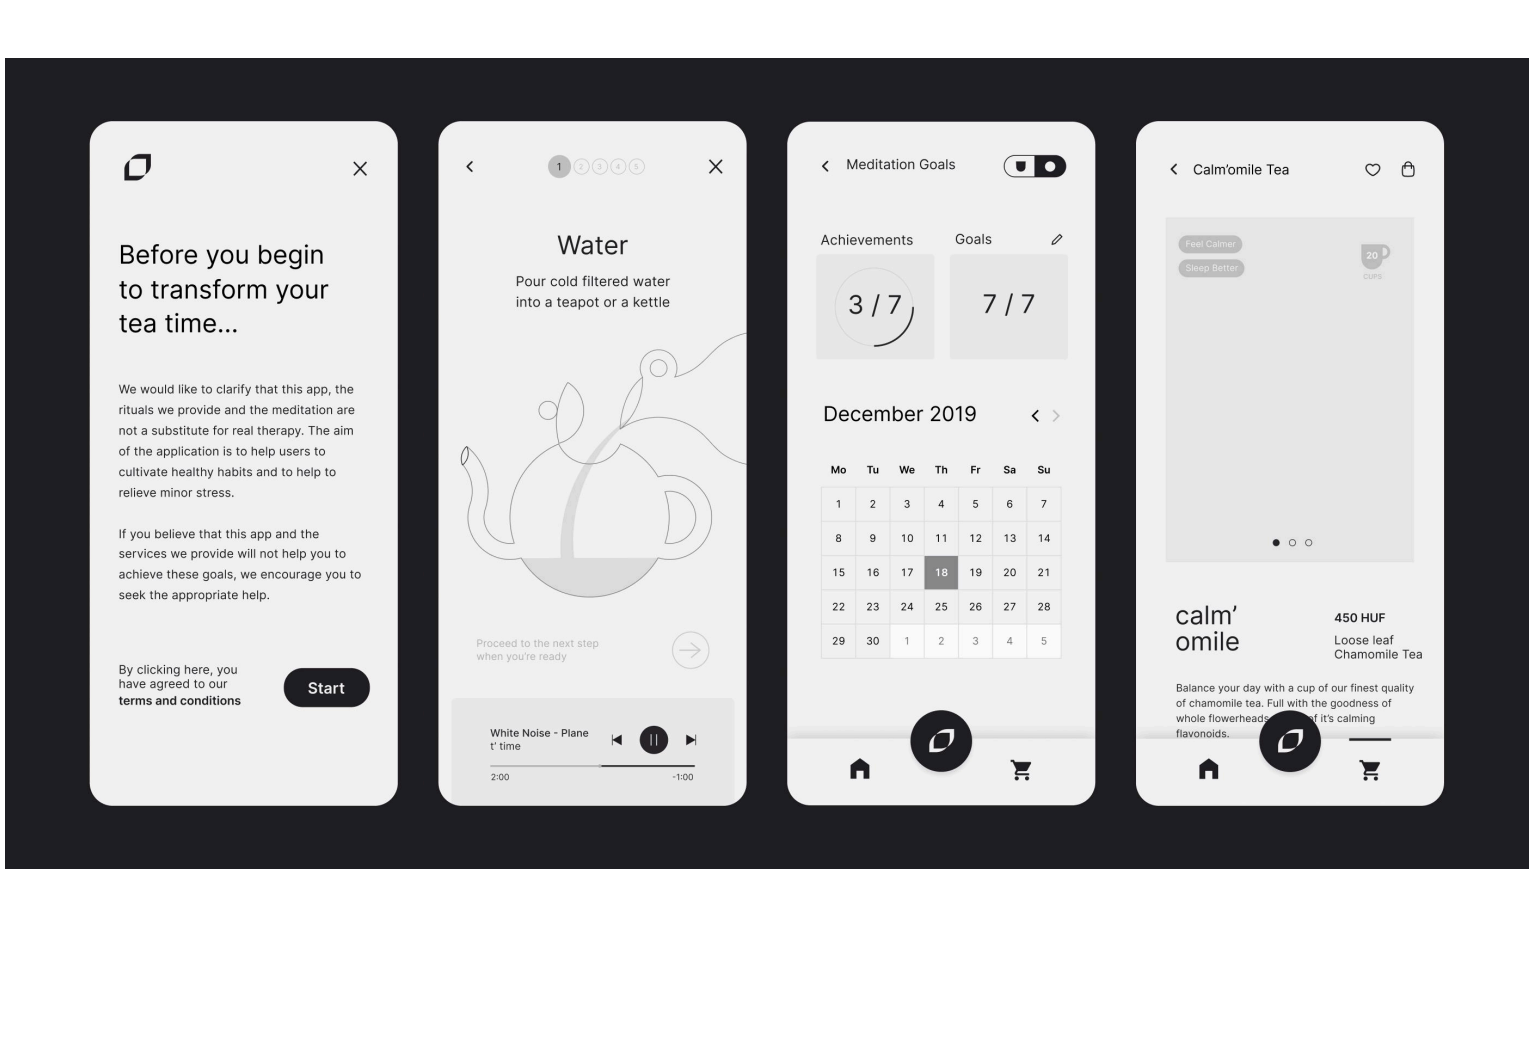




6. Designed information architecture with 2 entry points (QR code on packaging, downloaded app) and 3 core sections (Meditate, T'time ritual, Shop).



7. Wireframed all screens on the basis of 3 main userflows. Meditation, shopping and tea rituals.



8. Iterating to find the quickest and easiest navigation system.

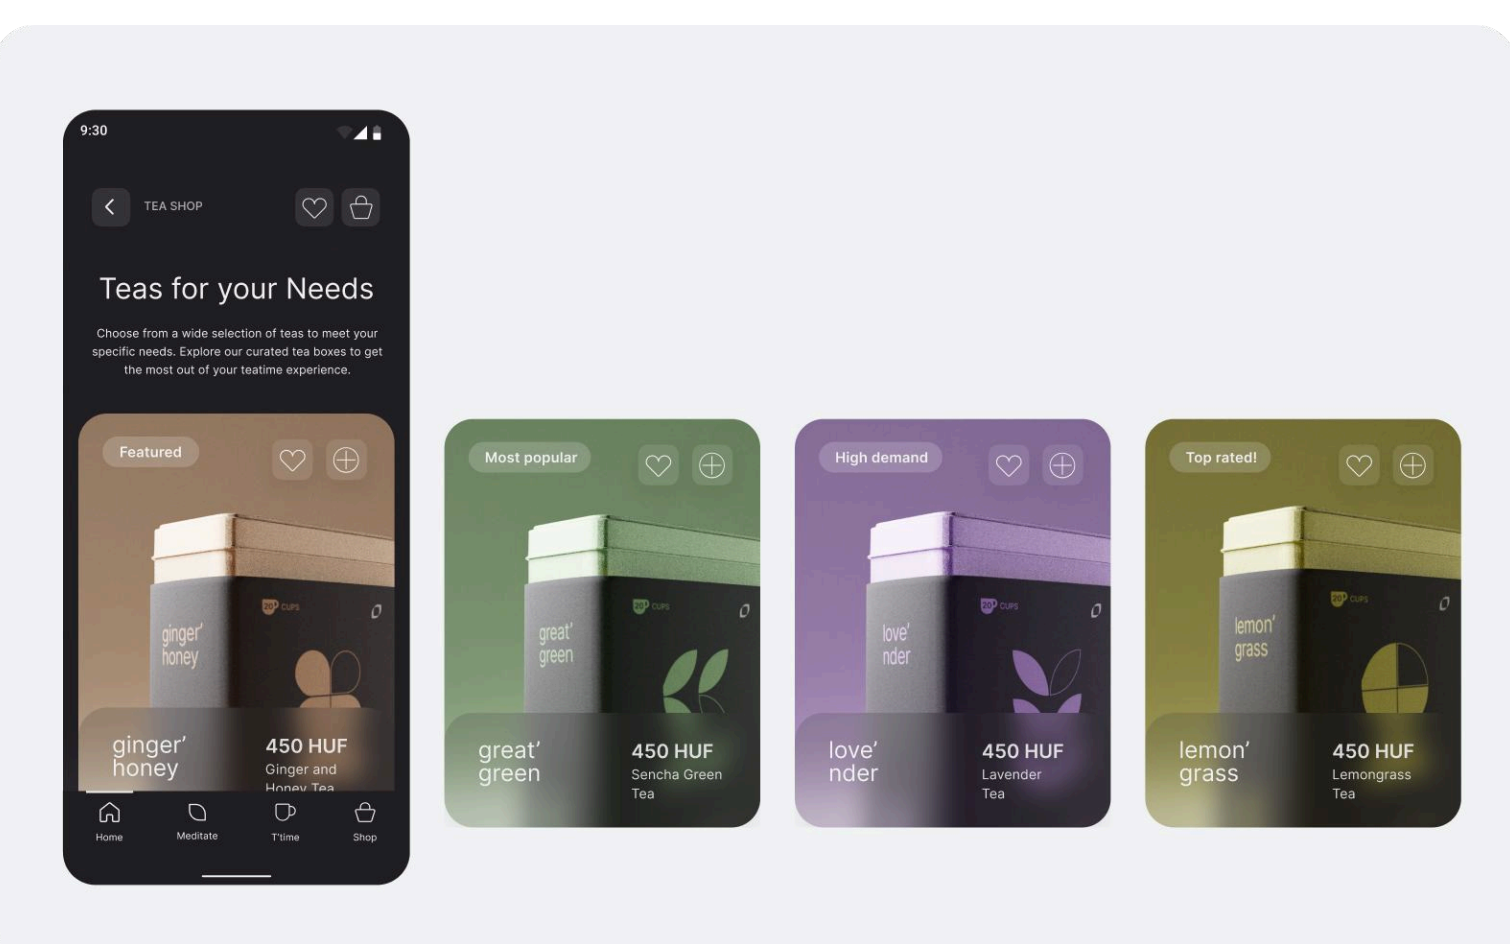
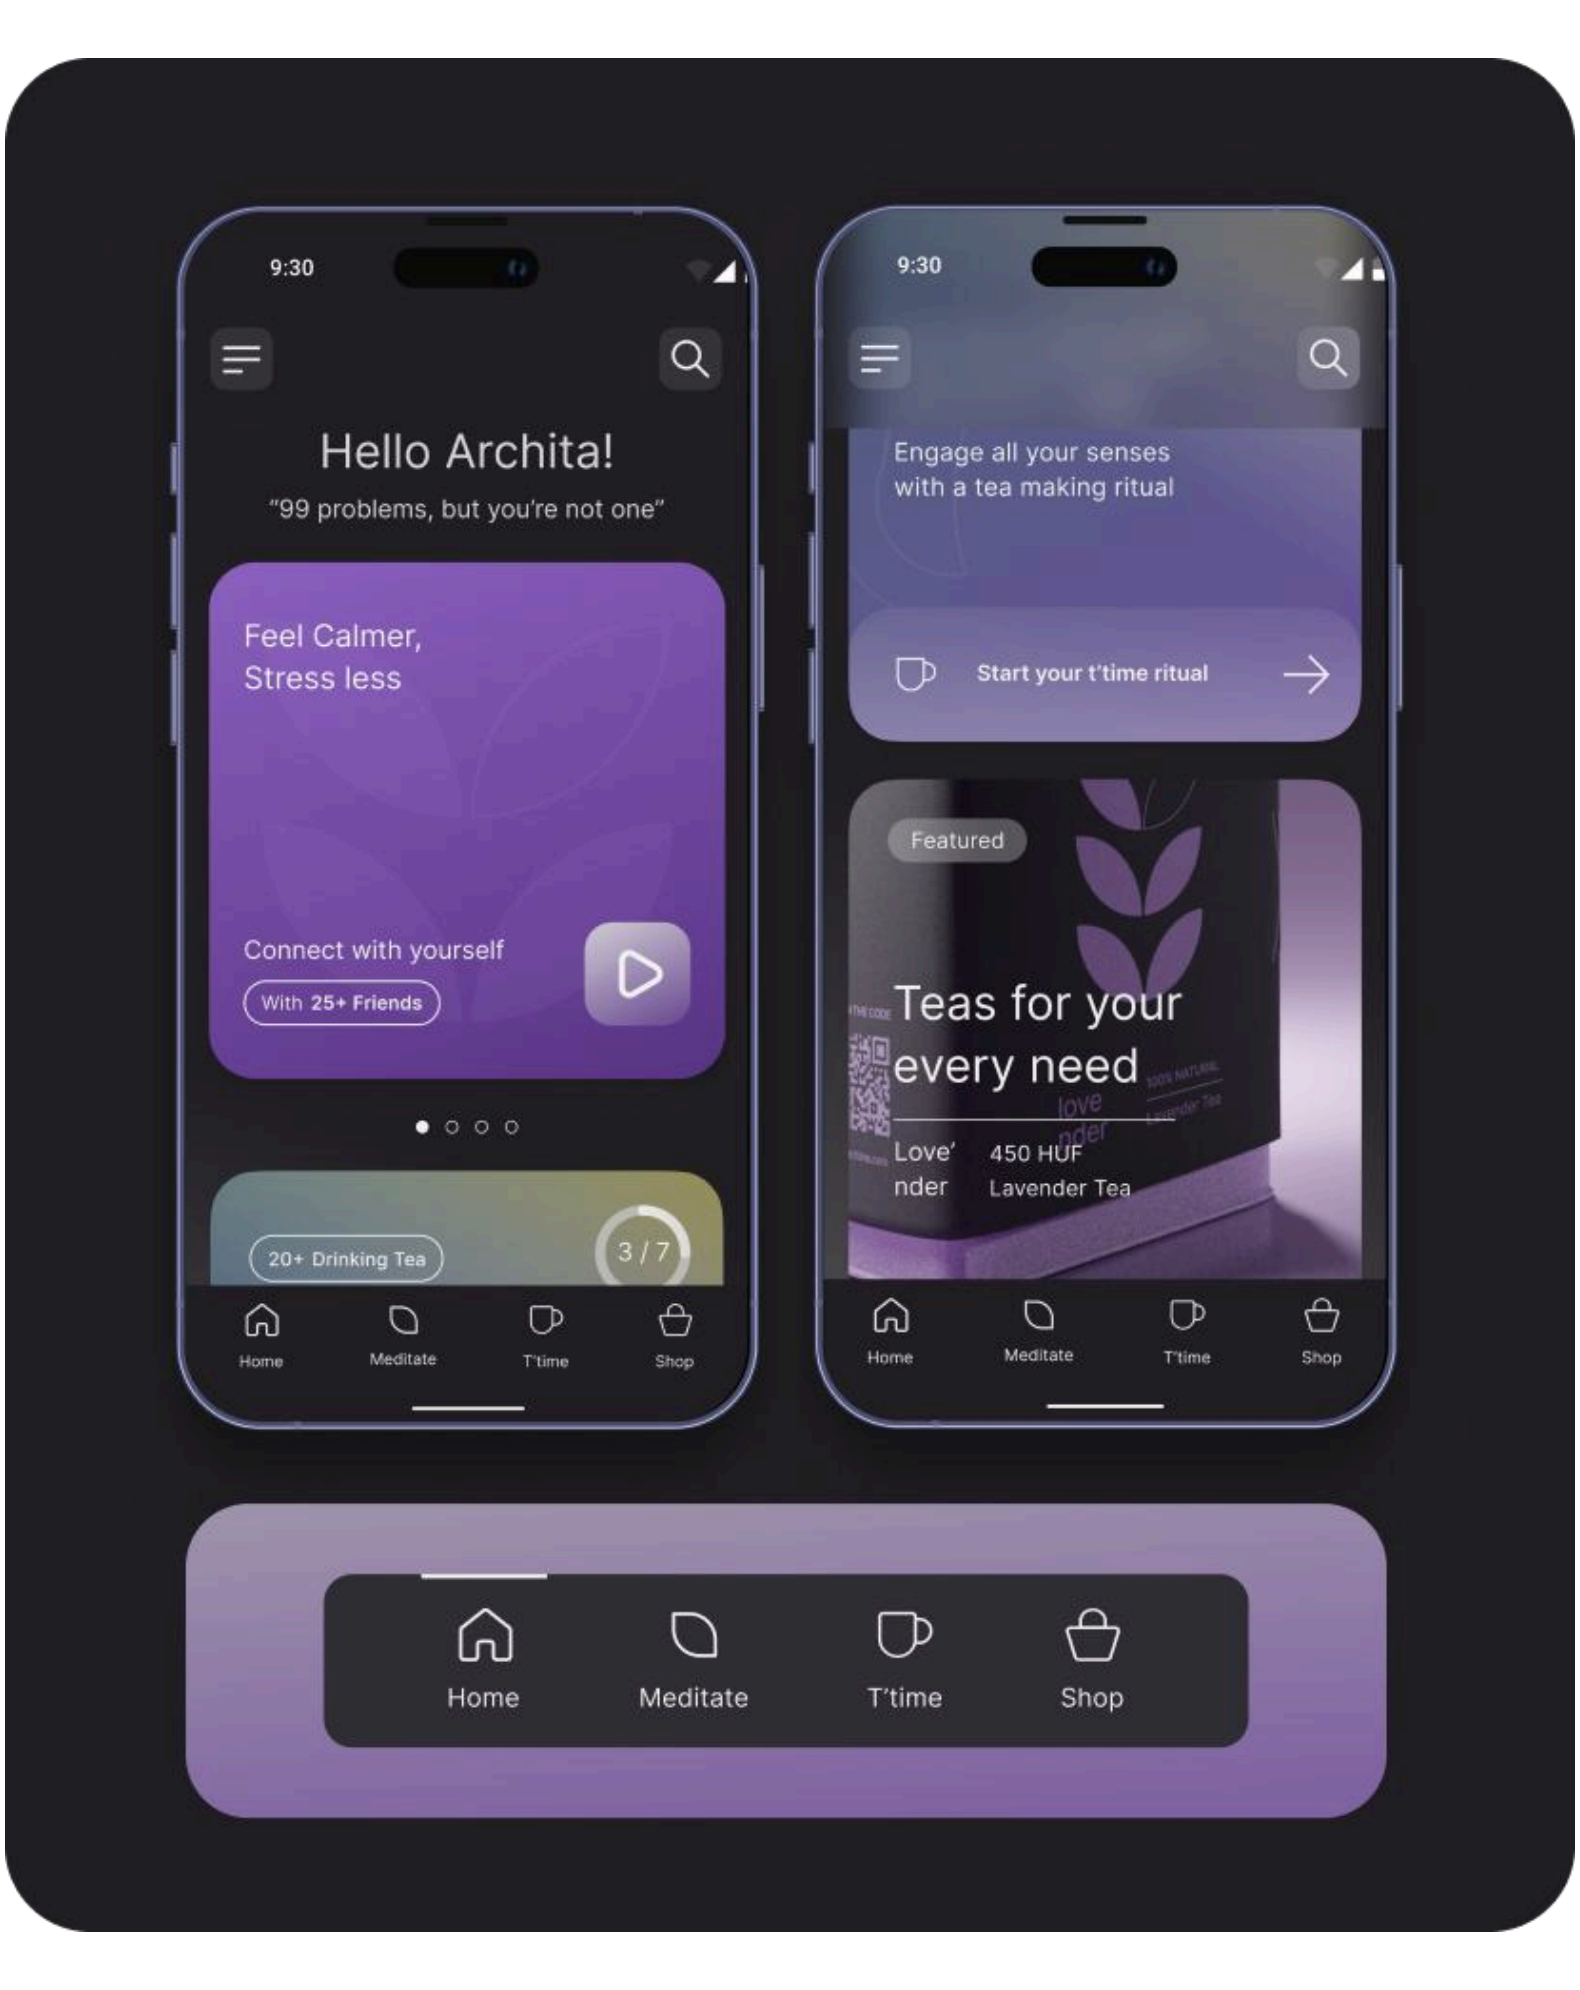
RELIEVE STRESS
FOCUS BETTER
You're not in this alone. We're here with you.
20+ meditating
Join us for a calming breathing exercise
MAKE TEA TIME INTO A RITUAL
Meditate
SHOP FROM OUR WIDE SELECTION OF TEAS

8. Designed the final UI across all app screens and states.

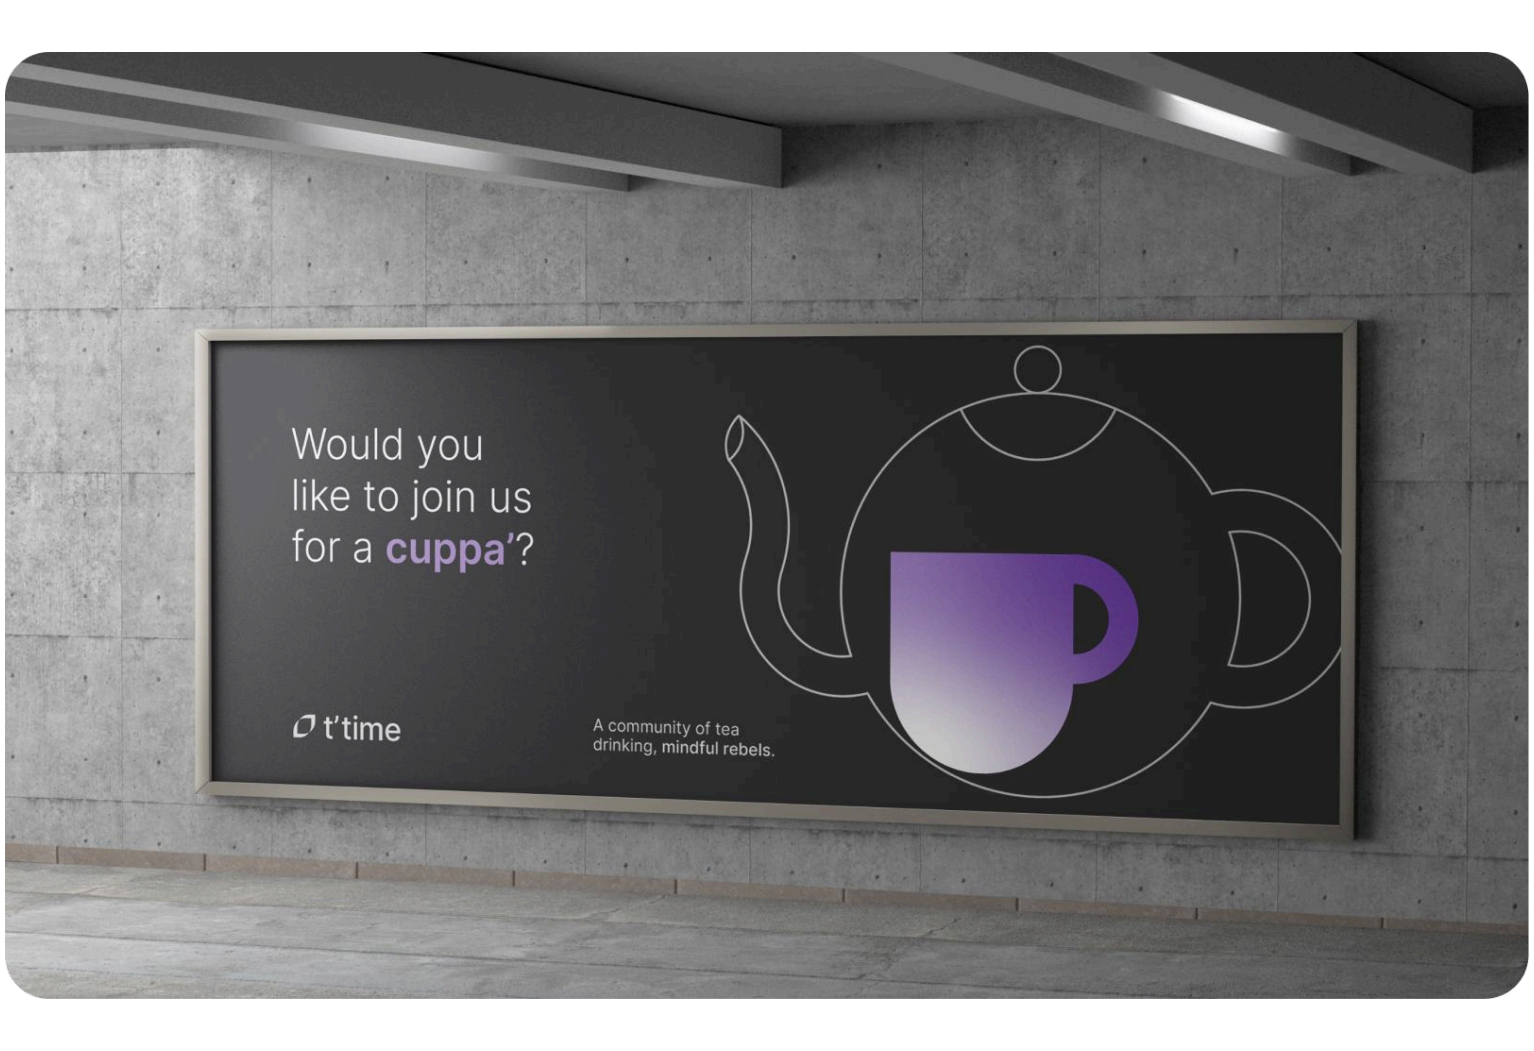




Solution

Full brand identity

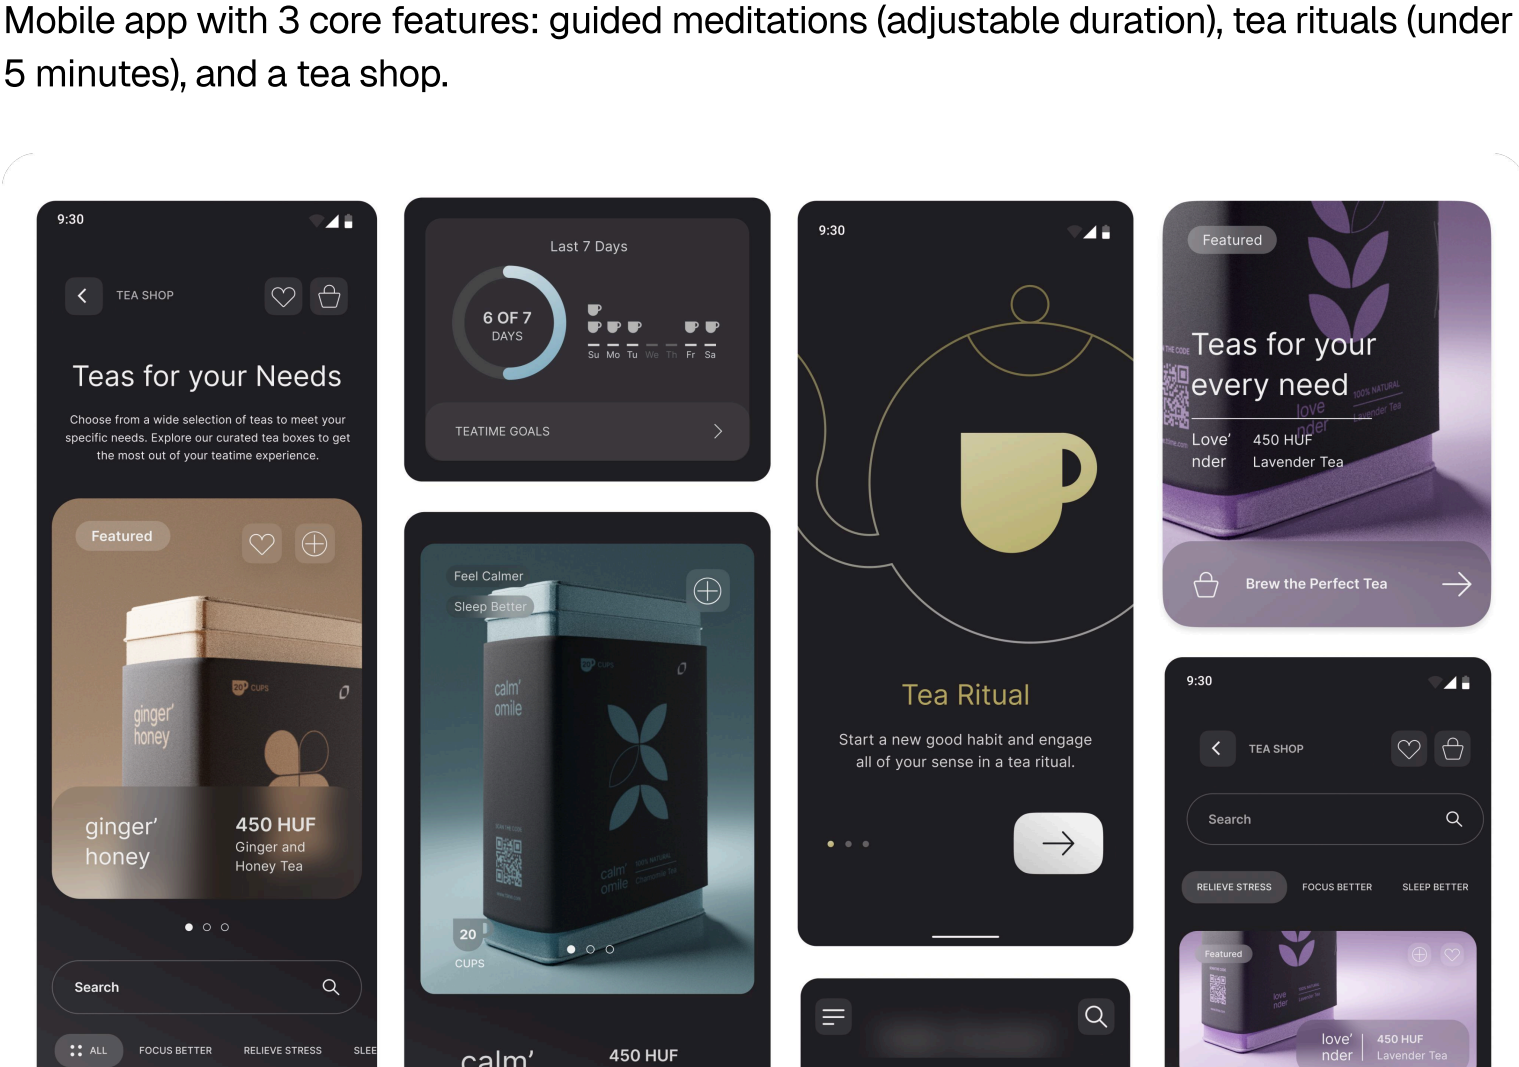
Wordmark, icon, colour palette, typography, and photography direction - all built around a dark, premium, botanical aesthetic.



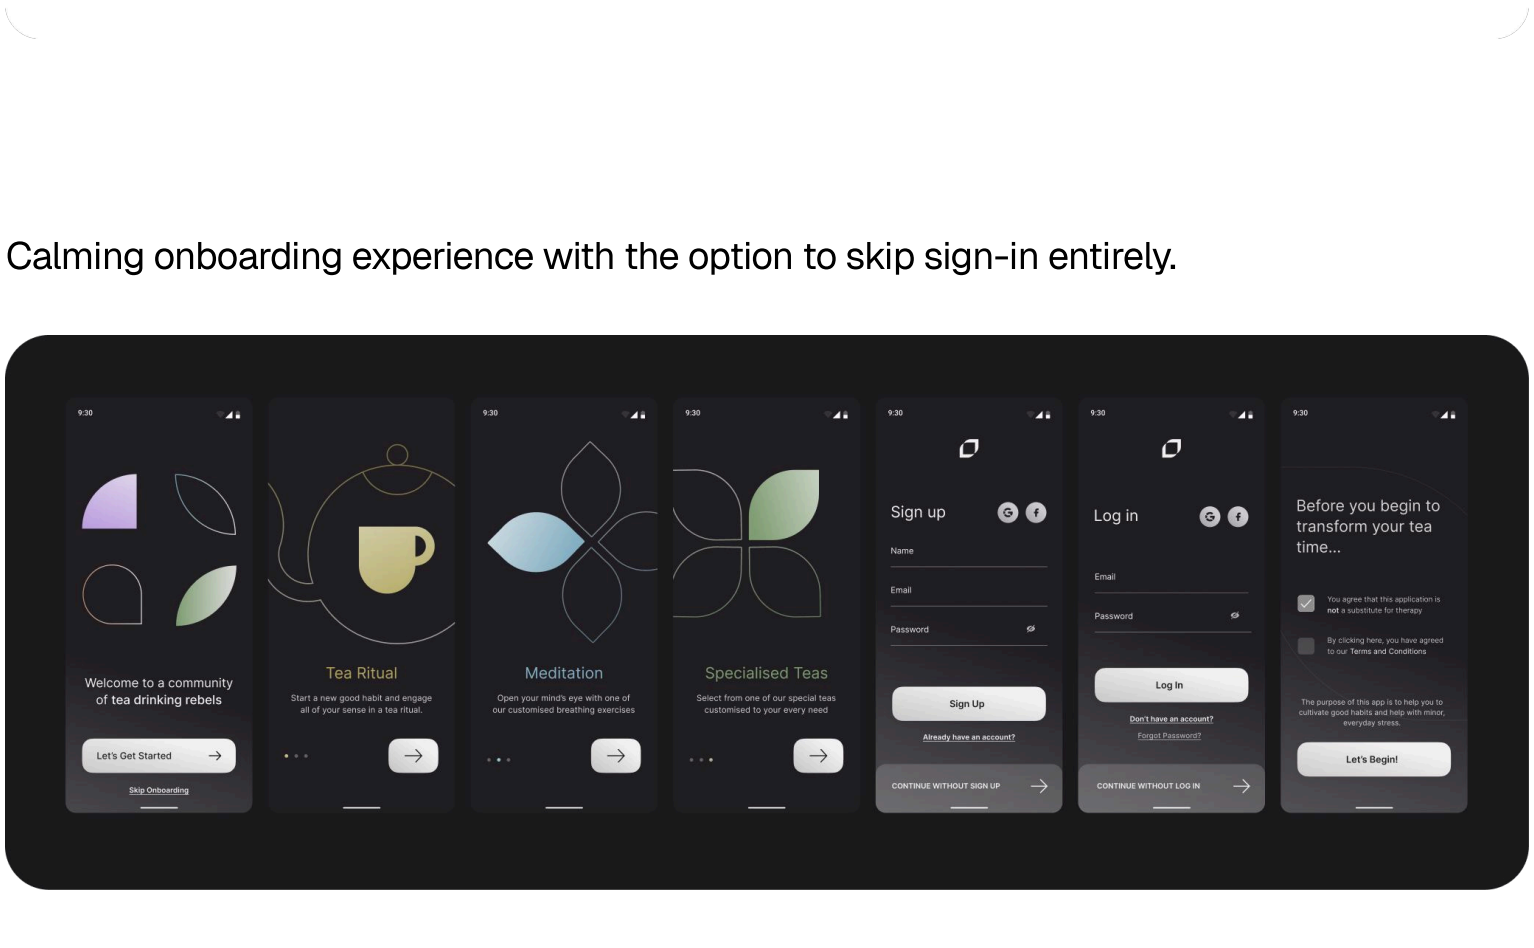
Would you like to join us for a cuppa?
t'time
A community of tea drinking, mindful rebels.

Physical tin packaging with colour-coded variants per tea blend and QR codes that link directly to the corresponding in-app meditation.

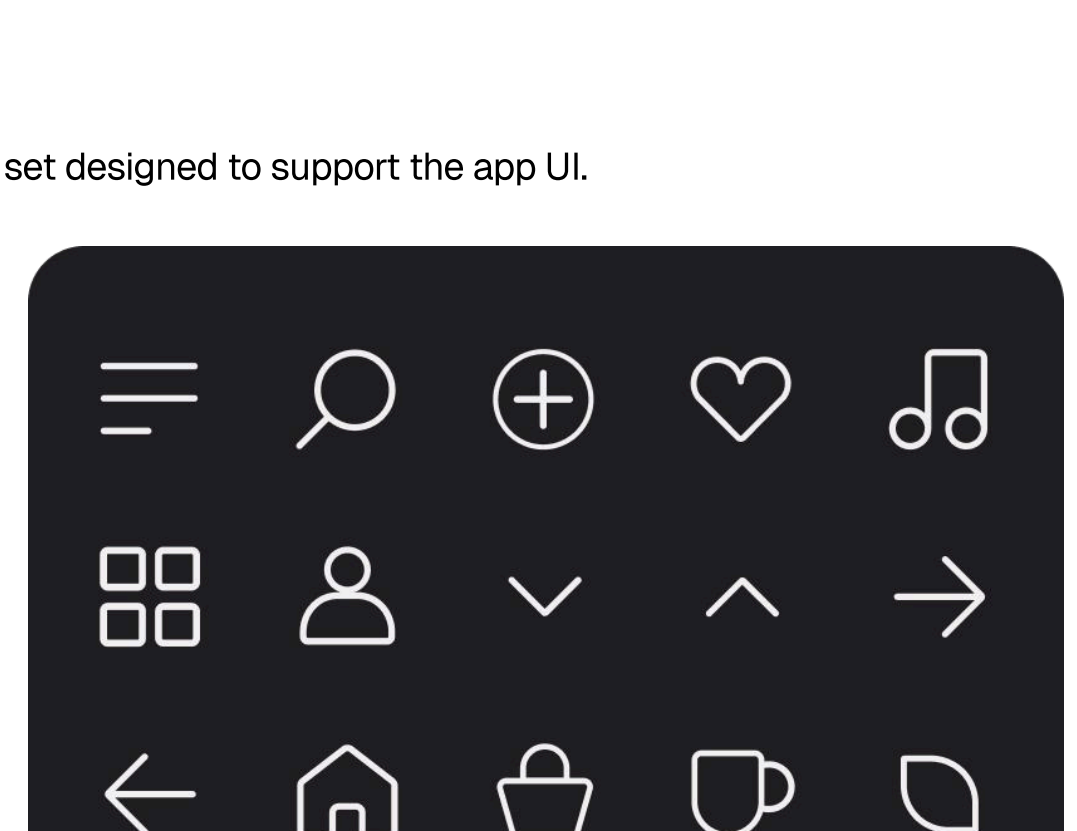
Mobile app with 3 core features: guided meditations (adjustable duration), tea rituals (under 5 minutes), and a tea shop.



Calming onboarding experience with the option to skip sign-in entirely.



Custom icon set designed to support the app UI.



Outcome

Graduated with distinction for my Masters in Graphic Design at Budapest Metropolitan University

The project was recognised for its cohesion across brand, packaging, and product design - demonstrating end-to-end design thinking from research through to production-ready UI.
